Sonlight Core A Instructor Guide:

100 Top Picks for Homeschool Curriculum Cathy Duffy, 2005 A critical volume for the homeschooling community that helps parents make informed choices regarding learning styles and curriculum

Teaching Numeracy Margie Pearse, K. M. Walton, 2011-03-23 Do some of your students arrive at wildly wrong answers to mathematical problems but have no idea why? If so, they are not alone. Many students lack basic numeracy, the ability to think through the math logically, solve problems, and apply it outside of the classroom. This book outlines nine critical thinking habits that foster numerate learning and details practical ways to incorporate those habits into instruction. Referencing the new common core standards, NCTM standards, and established literacy practices, the authors include how to use this in my math class tomorrow, applications throughout the book which show you how to monitor and repair students' understanding, guide students to recognize patterns, represent mathematics non-linguistically, encourage questioning for understanding, develop students' mathematics vocabulary, create a collaborative environment. Latter chapters show how to develop numeracy-rich lesson plans and provide several ready-to-use models with clear directions and student handouts. The book's practices, activities, and problems will help you move your students from simply doing the math to a deeper understanding of how to think through the math.

So You're Thinking About Homeschooling: Second Edition Lisa Whelchel, 2009-02-19 Discover the diversity of homeschooling. Confused and intimidated by the complexities of homeschooling, many parents assume it could never work for them. Now an updated edition of *So You're Thinking About Home Schooling* by Lisa Whelchel herself, a homeschooling mother of three, introduces to readers fifteen composite portraits of homeschooling families who show how every family can successfully face the unique challenges of its situation. The story-based approach deals with common questions of time management, teaching weaknesses, and outside responsibilities, as well as children's age variations, social and sports involvement, learning disabilities, and boredom. Seeing a wide variety of homeschooling families in action gives parents the information and confidence they need to make their own decisions about home-based education. Includes a new chapter from Lisa and an all-new resource guide with recommendations from real-life homeschooling families.

I'm Thinking About Homeschooling You're also probably thinking, "But can I really teach my children? Where do I start? What if I need to work outside the home? Must I have twelve children, raise goats, and bake my own bread? And what about socialization?" I could tell you the answers to these questions, but I would rather show you. Beginning with my own, I want to introduce you to fifteen families in fifteen unique situations who have all chosen to homeschool for different reasons, using a variety of learning methods. So let's rap lightly on the homeschool door and peek inside before we decide if we are ready to move in.

Story Behind the Book My hope is that by the end of the book and a stroll through the neighborhood, you will feel more confident as you identify a family situation and teaching method that resonates with your personality and philosophy of education. From there, you can simply look to the end of each chapter to find a sample schedule for the homeschool day and list of curriculum suggestions for that particular teaching method. Lisa
