

MATERNAL & CHILD - OB PEDS- HESI- NCLEX UPDATED

STUDY NOTES

Antepartum- stage of fertilization and fetal growth 47-40 weeks
 Intrapartum- baby will DELIVER!! (Process of Delivery)
 Postpartum-

Fertilization and Implantation

Fertilization:

Occurs in the upper region of the fallopian tubes within 12 hours of ovulation and 2 to 3 days of insemination, the average durations of viability for the ovum and sperm, respectively.

Once the ovum is fertilized, its membrane undergoes changes that prevent the entry of other sperm.

Sperm carry an X and a Y chromosome: XY is male, XX female.

Implantation:

The zygote propels itself down the fallopian tube, toward the uterus.

Implantation in the uterine wall occurs 6 to 10 days after ovulation.

Stages of Pregnancy

The third through eighth weeks after conception are called the embryonic stage.

The fetal period starts 9 weeks after conception and lasts through the end of gestation.

Pregnancy Stages		
 - Start of the first trimester. - Ovulation and conception. - During week 4 some female pregnancy tests will detect that you have conceived. - The embryo is just two cells. Month 1	 - Stage of Pregnancy: Embryo stage. Rapid cell division, increasing blood flow, and formation of structures. - The baby's heart is beating. - The baby's brain is forming. Month 2	 - Embryo officially becomes a fetus. - Increased morning sickness. - Fetus is about the size of a plum. Month 3
 - Start of the second trimester. - The baby's bones are hardening and will make itself up on its own. - The baby is about 5 inches long and weighs about 5 ounces. Month 4	 - You begin to feel the baby kick in May. - The baby's hearing starts developing. - Continued development during this month: blood vessels, heartbeats, eyelids, ear canals, and intestines. Month 5	 - This month marks the halfway mark in your pregnancy. - At the end of this month the baby is almost fully formed. Month 6
 - Possible appearance of Braxton Hicks contractions. - The baby's brain is beginning to produce signals and sounds. - The baby is about 13 inches long. Month 7	 - The baby is fully formed and putting on weight. - The baby's lungs are almost fully developed. Month 8	 Common discomforts: Braxton Hicks contractions, pelvic pressure, difficulty sleeping. Month 9
