

Unit 2: Networks of Exchange Exam Study Guide

C. 1200 - c. 1450

Topic 2.1 Silk Roads

Learning Objective

Explain the causes and effects of growth of networks of exchange after 1200.

Historical Developments

Improved commercial practices led to an increased volume of trade and expanded the geographical range of existing trade routes— including the **Silk Roads**—promoting the growth of powerful new trading cities.

Trading cities:

- Kashgar
- Samarkand

The growth of interregional trade in **luxury goods** was encouraged by innovations in previously existing transportation and commercial technologies, including the **caravan**, forms of **credit**, and the development of **money economies**.

New forms of credit and money economies:

- Bills of exchange
- Banking houses
- Use of paper money

Demand for luxury goods increased in AfroEurasia. Chinese, Persian, and Indian artisans and merchants expanded their production of textiles and **porcelains** for export; manufacture of iron and steel expanded in China.

1. Explain the various factors that led to the growth of the Silk Road trade networks in the 1200 - 1450 time period:

The factors that contributed to the growth of the Silk Roads was first the Abbasid and Chinese collaboration that expanded the Silk Roads farther and contributed luxury goods like porcelain that were in high demand. This was the first Golden Age. The Second Golden Age was when the Mongols rose to power and began conquering states. The Mongols created safer ways to travel on the silk Roads by enforcing laws that would prevent raiders. This attracted more people to the Silk Roads. Also since the Mongols were religiously tolerant the spread of religions along the Silk Road flourished.

2. What luxury goods were often traded along the Silk Roads?

Luxury goods that were often traded on the Silk Roads were animal furs, silk and silk clothing, jade, porcelain, and glass.

3. What transportation technologies facilitated trade along the Silk Roads?

Transportation technologies that facilitated along the Silk Roads were the caravans, camel, and caravan. Caravans were carts that could be pulled by camels and were often used because they could carry several goods. Caravans were groups of people traveling together along the Silk Roads because traders figured they would be safer from raiders if they traveled in groups rather than alone. Then the use of camel riding became useful because camels could go long distances without breaks or water which gave them the advantages over horses, especially since the Silk Roads tended to be in dry climates.

4. What commercial technology facilitated trade along the Silk Roads?
