

A low-angle, upward-looking photograph of several modern skyscrapers at night. The buildings are illuminated with various lights, and their glass facades reflect the city lights. The sky is a deep blue. The perspective creates a sense of height and architectural grandeur.

Private Finance Initiative Great Britain: Parliament: House of Commons: Treasury Committee,2012-01-11 Responses to HC 1146 session 2010 12 ISBN 9780215561206 CIB Proceedings 2015: Going north for sustainability: Leveraging knowledge and innovation for sustainable construction and development Prof. Charles Egbu,2015 This International Conference is about sustainability in its wider sense It is an important area of discourse as it pertains to how we work and how we lead our lives while considering the lives and workplaces of future generations The conference particularly sets out to explore some of the developments and challenges taking place in academia and industry in both the Northern and Southern hemispheres The conference is entitled Going north for sustainability The North signifies progress in technology education and other areas of human endeavour to many people Progress requires that people learn across continents and cultures

Private finance projects and off-balance sheet debt Great Britain: Parliament: House of Lords: Select Committee on Economic Affairs,2010-03-17 A report that recommends a reform of the way financial liabilities arising from private finance projects PFPs are treated in public accounts It also deals with the growth in the secondary market for PFPs where investors sell on their stake in a project in many cases once the construction period of that project has been completed

Developing Property Sustainably Sara J. Wilkinson,Sarah L. Sayce,Pernille H. Christensen,2015-06-05 Developing Property Sustainably introduces readers to the key issues surrounding sustainable property development in the global marketplace Pulling together received wisdom and original research the authors provide a clear and practical overview of the sustainable property development process as well as a critical appraisal of the problems faced by global built environment stakeholders Throughout the authors demonstrate how the property development industry could and should respond better to debate on sustainable practices in the built environment by adopting more rigorous measurement techniques and sustainable approaches Starting by exploring key definitions and stakeholders the book goes on to explore finance planning construction procurement occupation retrofit and lifecycle sustainability in order to provide the reader with a detailed understanding of all the issues involved in the delivery of sustainable property development from inception to occupation and beyond Throughout the book international case studies are used to demonstrate how sustainable property development is applied in practice around the world With a logical chapter structure and accessible writing style Developing Property Sustainably would be perfect for use on undergraduate and postgraduate modules and courses in real estate development property and urban development and other built environment programmes Cost Planning of PFI and PPP Building Projects Abdelhalim Boussabaine,2013-04-03 This topical and timely book presents and innovative approach to dealing with the complexities of cost planning in PFI PFI PPP projects have a significantly different costing environment from conventionally procured projects requiring cost analysts to use their expertise and innovative thinking to develop whole life cost solutions that deliver value for money to the client thus improving public building assets performance Abdelhalim

Boussabaine provides a thorough grounding in the theory of PFI from its early evolution through to examples of current projects. In particular the rationale for private financing of public services, arguments for and against PFI and value for money mechanisms are discussed. The book presents an innovative framework for whole life value and calls for changes in the way whole life cycle value is perceived, created and exchanged. Cost Planning of PFI and PPP Building Projects provides the reader with existing knowledge as well as present innovative thinking for future development and management of PFI PPP cost planning processes. Given the importance and novelty of this book, academics, professionals, undergraduate and postgraduate students will find this book valuable.

Risk Pricing Strategies for Public-Private Partnership Projects Abdelhalim

Boussabaine, 2013-10-10 Risk Pricing Strategies for Public Private Partnership Projects. Innovation in the Built Environment. The complexity of public private partnership PPP project procurement requires an effective process for pricing, managing and appropriate allocation of risks. The level at which risk is priced and the magnitude of risks transferred to the private sector will have a significant impact on the cost of the PPP deals as well as on the value for money analysis and on the selection of the optimum investment options. The construction industry tends to concentrate on the effectiveness of risk management strategies and to some extent ignores the price of risk and its impact on whole life cost of building assets. There is a pressing need for a universal framework for the determination of fair value of risks throughout the PPP procurement processes. Risk Pricing Strategies for Public Private Partnership Projects addresses the issues of risk pricing and demonstrates the use of a coherent strategy to arrive at a fair risk price. The focus of the book is on providing risk pricing strategies to maximise return on risk retention and allocation in the procurement of PPP projects. With its up to date coverage of the latest developments in risk pricing and comprehensive treatment of the methodologies involved in designing and building risk pricing strategies, the book offers a simple model for pricing risks. The book follows a thematic structure: PPP processes map risk uncertainty and bias risk pricing management strategies, risk pricing measurement and modelling risk pricing at each of the project life cycle stages and deals with all the important risk pricing issues using relevant real world situations through case study examples. It explains how the theory and strategies of risk pricing can be successfully applied to real PPP projects and reflects the broad understanding required by today's project risk analysts in their new and important role in PPP contract management. Property and Human Rights in a Global Context Ting Xu, Jean Allain, 2016-03-24. Property as a human rights concern is manifested through its incorporation in

international instruments and as a subject of the law through property related cases considered by international human rights organs Yet for the most part the relationship between property and human rights has been discussed in rather superficial terms lacking a clear substantive connection or common language That said the currents of globalisation have witnessed a new era of interrelation between these two areas of the law including the emergence of international intellectual property law and the recognition of indigenous claims which in fundamental ways speak to an engagement with human rights law This collection starts the conversation between human rights lawyers and property lawyers and explores analytical approaches to the increasing relationship between property and human rights in a global context The chapters engage with key theoretical and policy debates and range across three main themes The re evaluation of the public private divide in the law the tensions between the market and social justice in development and the balance between the rights of individuals and those of communities The chapters adopt a global comparative perspective and engage in case studies from countries including India Philippines Brazil the United States the United Kingdom and includes various regions of Africa and Europe
