*Each One Another* Rachel Haidu, 2023-07-28 A consideration of how contemporary art can offer a deeper understanding of selfhood With *Each One Another* Rachel Haidu argues that contemporary art can teach us how to understand ourselves as selves how we come to feel oneness to sense our own interiority and to shift between the roles that connect us to strangers those close to us and past and future generations Haidu looks to intergenerational pairings of artists to consider how three aesthetic vehicles shape in painting characters in film and video and roles in dance allow us to grasp selfhood Better understandings of our selves she argues complement our thinking

about identity and subjecthood She shows how Philip Guston's figurative works explore shapes descriptive capacities and their ability to investigate history while Amy Sillman's paintings allow us to rethink expressivity and oneness Analyzing a 2004 video by James Coleman Haidu explores how we enter characters through their interior monologues and she also looks at how a 2011 film by Steve McQueen positions a protagonist's refusal to speak as an argument for our right to silence In addition Haidu examines how Anne Teresa de Keersmaecker's distribution of roles across dancers invites us to appreciate formal structures that separate us from one another while Yvonne Rainer's choreography shows how such formal structures also bring us together Through these examples Each One Another reveals how artworks allow us to understand oneness interiority and how we become fluid agents in the world and it invites us to examine critically and forgivingly our attachments to selfhood

**A Compendium of the Systems of Divine Truth** Jacob Catlin, 1818 *It's Not Personal* Susan Best, 2021-06-17 How does something as potent and evocative as the body become a relatively neutral artistic material From the 1960s much body art and performance conformed to the anti expressive ethos of minimalism and conceptualism whilst still using the compelling human form But how is this strange mismatch of vigour and impersonality able to transform the body into an expressive medium for visual art Focusing on renowned artists such as Lygia Clark Marina Abramovic and Angelica Mesiti Susan Best examines how bodies are configured in late modern and contemporary art She identifies three main ways in which they are used as material and argues that these formulations allow for the exposure of pressing social and psychological issues In skilfully aligning this new typology for body art and performance with critical theory she raises questions pertaining to gender inter subjectivity relation and community that continue to dominate both our artistic and cultural conversation

**The Politics of Collecting** Eunsong Kim, 2024-06-24 In *The Politics of Collecting* Eunsong Kim traces how racial capitalism and colonialism situated the rise of US museum collections and conceptual art forms Investigating historical legal and property claims she argues that regimes of expropriation rather than merit or good taste are responsible for popular ideas of formal innovation and artistic genius In doing so she details how Marcel Duchamp's canonization has more to do with his patron's donations to museums than it does the quality of Duchamp's work and uncovers the racialized and financialized logic behind the Archive of New Poetry's collecting practices Ranging from the conception of philanthropy devised by the robber barons of the late nineteenth century to ongoing digitization projects Kim provides a new history of contemporary art that accounts for the complicated entanglement of race capital and labor behind storied art institutions and artists Drawing on history theory and economics Kim challenges received notions of artistic success and talent and calls for a new vision of art beyond the cultural institution

*The Recording Machine* Joshua Shannon, 2017-07-11 A revealing look at the irrevocable change in art during the 1960s and its relationship to the modern culture of fact This refreshing and erudite book offers a new understanding of the transformation of photography and the visual arts around 1968 Author Joshua Shannon reveals an oddly stringent realism in the period tracing artists' rejection of essential truths in favor of surface appearances Dubbing this tendency factualism Shannon illuminates not only the Cold War's preoccupation with data but also the rise of a pervasive culture of fact Focusing on the United States and West Germany where photodocumentary traditions intersected with 1960s politics Shannon investigates a broad variety of art ranging from conceptual photography and earthworks to photorealist painting and abstraction He looks closely at art by Bernd and Hilla Becher Robert Bechtle Vija Celmins Douglas Huebler Gerhard Richter and others These artists explored fact's role as a modern paradigm for talking thinking and knowing Their art Shannon concludes helps to explain both the ambivalent anti-humanism of today's avant-garde art and our own culture of fact

**Beyond the Aesthetic and the Anti-Aesthetic** James Elkins, Harper Montgomery, 2013-08-20 Each of the five volumes in the *Stone Art Theory Institutes* series and the seminars on which they are based brings together a range of scholars who are not always directly familiar with one another's work The outcome of each of these convergences is an extensive and unpredictable conversation on knotty and provocative issues about art This fourth volume in the series *Beyond the Aesthetic and the Anti-Aesthetic* focuses on questions revolving around the concepts of the aesthetic the anti-aesthetic and the political The book is about the fact that now almost thirty years after Hal Foster defined the anti-aesthetic there is still no viable alternative to the dichotomy between aesthetics and anti or nonaesthetic art The impasse is made more difficult by the proliferation of identity politics and it is made less negotiable by the hegemony of anti-aesthetics in academic discourse on art The central question of this book is whether artists and

as medium and instrument 0 to 9 and the New York Avant Garde Publishing by Numbers examines how the magazine both responded to and helped shape key developments in New York's often fractious avant garde communities. The book pays particular attention to the ways in which Mayer and Acconci foregrounded the material and generic qualities of the magazine and conceived their periodical as a means of generating as well as documenting art and poetry 0 to 9 and the New York Avant Garde considers the ways in which 0 to 9 interacted with other artistic movements and theoretical concerns of the period including cybernetics, Pop Art, structuralism and information theory. Arguing for the enduring importance of the magazine and its unique position in the history of New York's experimental art and literary scenes, this study contends that 0 to 9 was both a swan song of 1960s idealism and a precursor for the directions that avant garde art would take in the decades that followed the magazine's demise.
