Top Journals In Finance:

Ranking Finance Journals Using Author Affiliation Index Carl R. Chen, 2007 In this paper we use a new method to rank finance journals. Traditionally, journal qualities are measured either by the citation-based impact factor approach or by the survey method. Although these two approaches have merits, their efficacy is also limited in many ways. Author Affiliation Index is a cost-effective and intuitively easy-to-understand approach to journal rankings. We define Author Affiliation Index as the ratio of articles authored by faculties at the world's top 80 finance programs divided by the total number of articles by all authors. Forty-one finance journals are ranked according to this index. The effectiveness of the index is comparable to prior citation-based and survey-based studies. We find Author Affiliation Index, if properly constructed, provides an easy and credible way to supplement the existing journal ranking methods. Due to its easiness to construct, the index is particularly useful for junior faculty seeking the right journals to publish but is unable to justify the journal quality because these journals are not ranked in existing studies. Based upon various definitions of the Author Affiliation Index, our findings indicate that *Journal of Finance*, *Review of Financial Studies*, *Journal of Financial Economics*, *Journal of Financial and Quantitative Analysis*, and *Journal of Business* unambiguously claim the top five spots in finance journal rankings. Some newer journals such as *Journal of Corporate Finance* and *Journal of Financial Markets*, while ranked lower in the other studies, score impressively in our analysis. Compared with prior studies, our ranking is highly correlated with most of those journal rankings.

Finance Journal of Financial Economics and Review of Financial Studies from 1995 through 2005 Additionally the publication profile of 100 prolific authors in top tier finance journals is tabulated for these 94 journals Citations to non finance journals in economics and accounting are also tabulated for comparison with their finance counterpart along with working papers Five ranking schemes are constructed with each scheme identifying the top fifty finance journals Citations to finance journals are highly concentrated within ten journals and similarly for self citations Authors of papers appearing in top tier finance journals pay scant attention to the bulk of research published in other finance journals Furthermore these authors cite other economic journals with greater frequency than their counterpart in finance Of the top fifty finance journals identified in this paper only 19 are listed in Social Sciences Citation Index SSCI and this compares to approximately 500 listed economic journals Some glaring omissions from SSCI are identified but most notably the Journal of Applied Corporate Finance Journal of Financial Research Journal of Empirical Finance and Journal of Fixed Income An analysis of 2006 citations patterns is also presented The top tier mantra assigned to finance journals has a void with the decision by the Journal of Business to cease publication with the November 2006 issue This paper identifies five finance journals anyone of which could potentially fill the void

The Lunacy of Modern Finance Theory and Regulation Les

Coleman, 2014-08-01 This provocative book provides insight into a finance industry that is run for the benefit of banks and service providers who rely on Beatles era theories and regulation which are totally unsuited to the modern world The author has a near unique perspective based on over 30 years of working literally around the globe for corporates fund managers and as finance academic In his last role his research has focused on investment decisions and during 2012 he interviewed 34 fund

managers in Istanbul London New York and Melbourne He blends rich understanding of finance theory and practice to unravel the investment industry s structure and show how banks and other finance institutions privilege themselves at investors expense The book highlights that finance industry self regulation is weak Risks from inexpertise theft bad data and other sources are high Regulation of the industry appears to be ineffectual with the setting of such a high bar that it is virtually impossible to successfully prosecute even the most blatant and egregious offenders The book closes with the simple suggestion that corporations regulations be altered to introduce the strict liability offence of being a director or officer of a large bank that becomes bankrupt This follows the strategy of legislation that has been effective in cleaning up the environment making workplaces safer and reducing crime by punishing those responsible for an offence
