Woke Gaming Kishonna L. Gray, David J. Leonard, 2018-11-13 From Gamergate to the 2016 election to the daily experiences of marginalized perspectives gaming is entangled with mainstream cultures of systematic exploitation and oppression Whether visible in the persistent color line that shapes the production dissemination and legitimization of dominant stereotypes within the industry itself or in the dehumanizing representations often found within game spaces many video games perpetuate injustice and mirror the inequities and violence that permeate

society as a whole Drawing from groundbreaking research on counter and oppositional gaming and from popular games such as World of Warcraft and Tomb Raider Woke Gaming examines resistance to problematic spaces of violence discrimination and microaggressions in gaming culture The contributors of these essays seek to identify strategies to detox gaming culture and orient players and gamers toward progressive ends From Anna Anthropy's Keep Me Occupied to Momo Pixel's Hair Nah video games can reveal the power and potential for marginalized communities to resist and otherwise challenge dehumanizing representations inside and outside of game spaces In a moment of MeToo BlackLivesMatter and efforts to transform current political realities Woke Gaming illustrates the power and potential of video games to foster change and become a catalyst for social justice

Sociology as Method Paul Dowling, 2009-01-01 Dowling is using the term forensics to refer to approaches to research that claim to uncover truths about the world that are somehow independent of the means of their uncovering For some time now such approaches have been widely regarded as naïve but it is not clear that the implications of this recognition have always been adequately or appropriately taken into account In attempting to do just that Dowling presents a mature exposition of his organisational language social activity method SAM in dialogue with a wide range of cultural settings texts and technologies SAM has been developed over a period of some twenty years via the transaction between a fundamental theoretical principle and empirical data This principle asserts that the sociocultural is to be understood in terms of strategic autopoietic action directed at the formation maintenance and destabilising of alliances and oppositions and the alliances and oppositions that are themselves emergent upon such action This anti forensic constructive description understands data texts not as products of generative structures that lie behind them but as instances of the organisational language SAM that will ultimately describe them and that is in a sense in front of them Dowling describes himself as a theory engineer The productivity of this work is in its potential to generate principled and articulated descriptions of empirical settings and texts new ways of looking at them not to direct but to interrogate other practices relating to these settings and texts to ask questions that would otherwise be left unasked The origins of SAM lie in the analysis of mathematics education texts in the late 1980s and early 1990s and one of the chapters in this volume is again concerned with mathematics and science education in the first part of the twenty first century Other settings that come under scrutiny include classrooms film art literature knowledge in various domains the internet and so forth The book also includes fundamental engagement with forensics in particular the work of and work inspired by Basil Bernstein Paul Dowling is Professor of Education at the Institute of Education University of London Before joining the Institute in 1987 he had taught mathematics in secondary schools in and around London His other publications include The Sociology of Mathematics Education Mathematical Myths Pedagogic Texts 1998 Falmer Press and Doing Research Reading Research Re interrogating education with Andrew Brown Routledge 1998 and 2009
