Contours of Deportation Bridget Anderson, Matthew J. Gibney, Emanuela Paoletti, 2012-11-05 In recent years states across the world have boosted their legal and institutional capacity to deport noncitizens residing on their territory including failed asylum seekers illegal migrants and convicted criminals Scholars have analyzed this development primarily through the lens of immigration control Deportation has been viewed as one amongst a range of measures designed to control entrance distinguished primarily by the fact that it is exercised inside the territory of the state But deportation also has broader social and political effects It provides a powerful way through which the state reminds noncitizens that their presence in the polity is contingent upon acceptable behavior Furthermore in liberal democratic states immunity from deportation is one of the key privileges that citizens enjoy that distinguishes them from permanent residents This book examines the historical institutional and social dimensions of the relationship between deportation and citizenship in liberal democracies Contributions also include analysis of the formal and informal functions of administrative immigration detention and the role of the European Parliament in the area of irregular immigration and borders The book also develops an analytical framework that identifies and critically appraises grassroots and sub national responses to migration policy in liberal democratic societies and considers how groups form after deportation and the employment of citizenship in this particular context making it of interest to scholars and international policy makers alike It is commonly surmised that the increased flows of goods ideas finance and people are slowly leading to the dissolution of boundaries between nation states However as the varied and excellent chapters in this collection demonstrate the enforcement of state power through detention and deportation is still a real and growing feature of contemporary political life Expulsion has always been a moral sanction think of Adam and Eve being banished from the Garden of Eden or the ostracism directed against dissidents in ancient Athens who were forced to leave for ten years As the editors suggest deportation remains a means of enforcing a normative order a community of values while the authors and editors of this book have expanded the subject matter to include the deportees perspectives and the effects of deportation on families other potential victims and on those whose social inclusion has been affirmed by the exclusion of others These studies will enrich and enlarge the study of the more naked forms of state power Robin Cohen Professor Emeritus of Development Studies University of Oxford This wide ranging well researched and highly informative work is a major contribution to the growing body of scholarship examining the harsh consequences of deportation around the world The editors have gathered an impressive group of scholars who craft an eclectic view of how deportation has evolved what it may signify and how it now works in various settings With its inclusion of historical institutional comparative and finely textured sensitive experiential studies this book offers an important if frequently distressing overview of phenomena that deserve our full attention Daniel Kanstroom Professor of Law and Director International Human Rights Program Boston College Law School **Vincent Motorcycles** Philippe Guyony, Very few motorcycles have carved a mark in history like the Vincent V twin from its arrival in 1946 and up to the present day On the

road in club racing in drag races or competing for land speed records it dominated the motorcycle world leading to the famous catchphrase coined by the factory The World's Fastest Standard Motorcycle It was a FACT NOT a slogan Images such as that of Rollie Free in swimming trunks laying flat on his works modified Black Shadow and taking the American motorcycle land speed record at Bonneville in 1948 have now passed into posterity In fact the big Vincent was so ahead of its time that it continued to compete successfully almost arrogantly in racing until the mid 1970s against modern bikes No other motorcycle in the world can claim this kind of achievement Following the premature ending of Vincent production Fritz Egli's 1967 Egli Vincent was the first chassis completely redesigned for a Vincent in 21 years Egli's machine inspired numerous builders for several generations and this book traces holistically the story of all those motorcycles in the broad context of the classic and modern history of the Vincent Understand how the flame of passion still burns brightly today **Mapping**
