Trust Game English Edition:

Trust Toshio Yamagishi, 2011-09-13 This book is written around the central message that collectivist societies produce security but destroy trust In collectivist societies people are connected through networks of strong personal ties where the behavior of all agents is constantly monitored and controlled As a result individuals in collectivist networks are assured that others will abide by social norms and gain a sense of security erroneously thought of as trust However this book argues that this security is not truly trust based on beliefs regarding the integrity of others but assurance based on the system of mutual control within the network In collectivist societies security is assured insofar as people stay within the network but people do not trust in the benevolence of human nature On the one hand transaction costs are reduced within collectivist networks as once accepted into a network the risk of being maltreated is minimized However joining the network requires individuals to pay opportunity cost that is they pay a cost by forgoing potentially superior opportunities outside the security of the network In this era of globalization people from traditionally collectivistic societies face the challenge of learning how to free themselves from the security of such collectivistic networks in order to explore the opportunities open to them elsewhere This book presents research investigating how the minds of individuals are shaped by the conflict between maintaining security inside closed networks of strong ties and venturing outside of the network to seek out new opportunities **Trust**

in Social Dilemmas Paul A. M. van Lange, Bettina Rockenbach, Toshio Yamagishi, 2017 How do we help people be more cooperative with one another *Trust in Social Dilemmas* explores fundamental scientific questions about how and why trust may affect human cooperation By showcasing recent research in the field through the lens of some of its leading scholars this book provides an important overview of research on trust as it explores topics such as the functioning of relationships organizations and societies at large **For Public Service Or Money**, 2005 Abstract Geographical imbalances in the health

workforce have been a consistent feature of nearly all health systems especially in developing countries The authors investigate the willingness to work in a rural area among final year nursing and medical students in Ethiopia Analyzing data obtained from contingent valuation questions they find that household consumption and the student's motivation to help the poor which is their proxy for intrinsic motivation are the main determinants of willingness to work in a rural area The authors investigate who are willing to help the poor and find that women are significantly more likely to help than men Other variables including a rich set of psycho social characteristics are not significant Finally the authors carry out some simulations on how much it would cost to make the entire cohort of starting nurses and doctors choose to take up a rural post

Social Networks and Trust Vincent Buskens, 2005-12-27 *Social Networks and Trust* discusses two possible explanations for the emergence of trust via social networks If network members can sanction untrustworthiness of actors these actors may refrain from acting in an untrustworthy manner Moreover if actors are informed regularly about trustworthy behavior of others trust will grow among these actors A unique combination of formal model building and empirical methodology is used

to derive and test hypotheses about the effects of networks on trust The models combine elements from game theory which is mainly used in economics and social network analysis which is mainly used in sociology The hypotheses are tested 1 by analyzing contracts in information technology transactions from a survey on small and medium sized enterprises and 2 by studying judgments of subjects in a vignette experiment related to hypothetical transactions with a used car dealer **A**

Karen S. Cook, Margaret Levi, Russell Hardin, 2009-11-25 Conventional wisdom holds that trust is essential for cooperation between individuals and institutions such as community organizations banks and local governments Not necessarily so according to editors Karen Cook Margaret Levi and Russell Hardin Cooperation thrives under a variety of circumstances Whom Can We Trust examines the conditions that promote or constrain trust and advances our understanding of how cooperation really works From interpersonal and intergroup relations to large scale organizations Whom Can We Trust uses empirical research to show that the need for trust and trustworthiness as prerequisites to cooperation varies widely Part I addresses the sources of group based trust One chapter focuses on the assumption versus the reality of trust among coethnics in Uganda Another examines the effects of social network position on trust and trustworthiness in urban Ghana and rural Kenya And a third demonstrates how cooperation evolves in groups where reciprocity is the social norm Part II asks whether there is a causal relationship between institutions and feelings of trust in individuals What does and doesn t promote trust between doctors and patients in a managed care setting How do poverty and mistrust figure into the relations between inner city residents and their local leaders Part III reveals how institutions and networks create environments for trust and cooperation Chapters in this section look at trust as credit worthiness and the history of borrowing and lending in

the Anglo American commercial world the influence of the perceived legitimacy of local courts in the Philippines on the trust relations between citizens and the government and the key role of skepticism not necessarily trust in a well developed democratic society Whom Can We Trust unravels the intertwined functions of trust and cooperation in diverse cultural economic and social settings The book provides a bold new way of thinking about how trust develops the real limitations of trust and when trust may not even be necessary for forging cooperation A Volume in the Russell Sage Foundation Series on Trust
