Design and Applications of Nanostructured Polymer Blends and Nanocomposite Systems Sabu Thomas, Robert Shanks, Sarath Chandran, 2015-09-22 Design and Applications of Nanostructured Polymer Blend and Nanocomposite Systems offers readers an intelligent thorough introduction to the design and applications of this new generation of designer polymers with customized properties The book assembles and covers in a unified way the state of the art developments of this less explored type of material With a focus on nanostructured polymer blends the book discusses the science of nanostructure formation and the potential performance benefits of nanostructured polymer blends and composites for applications across many sectors electronics coatings adhesives energy photovoltaics aerospace automotive and medical devices biocompatible polymers The book also describes the design morphology and structure of nanostructured polymer composites and blends to achieve specific properties Covers all important information for designing and selecting the right nanostructured polymer system Provides specialized knowledge on self repairing nanofibre and nanostructured multiphase materials as well as evaluation and testing of nanostructured polymer systems Serves as a reference guide for development of new products in industries ranging from electronics coatings and energy to transport and medical applications Describes the design morphology and structure of nanostructured polymer composites and blends to achieve specific properties *Drum*, 2007

Emerging Engineering Technologies and Industrial Applications El Kacimi, Younes, Alaoui, Khaoula, 2024-05-06 Engineers have long been architects of progress erecting massive buildings that touch the skies and designing technologies that redefine realms of known possibility In this era of rapid change keeping pace with innovation is the main challenge Emerging Engineering Technologies and Industrial Applications is a comprehensive research book that delves deep into the heart of a relentless technological revolution within modern industry From the limitless potential of the Internet of Things IoT to the cognitive wonders of Artificial Intelligence AI from the microscopic marvels of Nanotechnology to the precision and agility of Robotics and from the revolutionary advancements in 3D Printing to the transformative capabilities of blockchain this book explores emerging technologies This book is an indispensable resource for professionals and researchers working in the field of emerging engineering technologies and their industrial applications It caters to a diverse range of disciplines including computer science and information technology environmental agricultural and physical sciences medical healthcare and life sciences as well as science and engineering and anyone seeking to navigate the current technological progress in the 21st century

The Urban Ecologies of Divided Cities Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions

Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers

Layered Double Hydroxides (LDHs) Roberto Pizzoferrato, Maria Richetta, 2021-04-01 Layered Double Hydroxides LDHs certainly do not represent a newcomer to the scientific community yet they continue to attract a strong and general interest among a vast and multifaceted range of researchers This persistent modernity is definitely due to some peculiar characteristics of these materials which allow researchers and engineers to play with different aspects of two worlds organic and inorganic crystalline and molecular solid

and liquid cationic and anionic A virtually infinite number of possible chemical combinations takes advantage of their layered structure to express an unrivaled collection of remarkable properties The capture and or release of organic and inorganic species versatile low cost catalytic activity and blending with other compounds to build up a variety of hybrid composites are just some of the many effects investigated to date As a result the applications encompass almost all aspects of our life ranging from renewable energy production to water purification including biomedical applications gas sensing drug delivery and food packaging and safety This Special Issue highlights some of the recent research lines and shows that remarkable progress has been and is still being made in all these aspects to allow the consideration of LDHs as one of the most interesting and versatile inorganic materials

Bioengineered Nanomaterials for Wound Healing and Infection Control
Hamed Barabadi,Muthupandian Saravanan,Ebrahim Mostafavi,Hossein Vahidi,2023-08-01 Bioengineered Nanomaterials for Wound Healing and Infection Control is a key reference for those working in the fields of materials science pharmacy nanotechnology biomedical engineering and microbiology Bioengineered nanomaterials have unique physicochemical properties which promote accelerated wound healing and treatment of infections The biosynthesis of these nanomaterials also offers a clean safe and renewable alternative to traditional nanomaterials helping reduce environmental impact alongside antibacterial resistance Provides an overview of the role of biofilms and multidrug resistance in wound infections Covers a range of bioengineered nanomaterial types and nanotechnology based approaches including phyconanotechnology phytonanotechnology and microbial nanotechnology Helps readers discover novel materials for use in wound healing and infection control while reducing the probability of antibiotic resistance

The Guide to COIL Virtual Exchange Jon Rubin,Sarah Guth,2023-07-03 This is the authoritative guide to implementing COIL Virtual Exchange conceived and co edited by one of the originators of this innovative approach to internationalization Jon Rubin COIL the acronym for Collaborative Online International Learning is a central modality of what has come to be known as virtual exchange Since its first iteration in 2002 it has gradually established itself as a mature pedagogy that is being increasingly implemented across the world and is validated by a growing body of research COIL Virtual Exchange at its most essential is a bi lateral online exchange involving the integration of existing courses across two or sometimes more institutions that are geographically and or culturally distinct To launch a COIL VE course the instructor of a class at a higher education institution in one location links online with a professor and his or her class in another region or country Together their students engage and develop joint projects usually over a continuous five to eight week period Compared to the limited number of students worldwide who can engage in study abroad COIL VE potentially opens up more equitable and inclusive

participation in international education and intercultural experiences to all students involves them in rigorous disciplinary and interdisciplinary studies and promotes close and constructive engagement with students with different cultural perspectives While many COIL courses are launched by individual instructors based on their research connections and online outreach they are being increasingly supported and led by dedicated COIL Coordinators who facilitate virtual exchanges and provide professional development This comprehensive guide covers COIL VE pedagogy provides examples of what takes place in the COIL classroom and explores what instructors and staff need to know to facilitate and support a variety of COIL courses across the curriculum It addresses how institutional stakeholders especially those in leadership positions can develop and embed a successful COIL initiative at their institution It offers varied perspectives of COIL viewed from different institutional and cultural vantage points from research universities community and technical colleges and university systems and describes how COIL VE is developing in five different world regions presenting eleven case studies The book concludes with a guide to thirteen global organizations that support COIL and other forms of VE Additionally the book provides links to the COIL Connect for Virtual Exchange website <https://coilconnect.org> which includes an updated directory of organizations an expanding database of faculty and institutions participating in COIL and looking for partners course templates survey data and case studies This book offers faculty and administrators across the world whether formally involved in international education in service learning and community engagement or wanting to incorporate a cross cultural perspective in their disciplinary courses theoretical foundations guidance on effective collaboration and the strategic and pedagogical considerations to develop robust COIL VE courses and programs

Structuring Mass

Higher Education David Palfreyman, Ted Tapper, 2012-10-12 Undoubtedly the most important development in higher education in recent years has been the seemingly inexorable expansion of national systems In a comparatively short time period many countries have moved from an elite to a mass model Furthermore expansion has invariably changed the whole experience of higher education for all the interested parties from presidents rectors and vice chancellors to first term undergraduates Structuring Mass Higher Education examines the impact of this change upon the existing national structures of higher education It also defines and highlights what makes an elite university something which institutions must strive for in order to gain their position as global players With case studies and contributions from a wide range of international authors the book explores questions such as Do higher education institutions retain a national significance even though the vestiges of an international reputation have long faded Has expansion undermined the quality of higher education because governments sought to expand on the cheap Is the elite institutional response to mass higher education perceived as a threat to be responded to with purposeful action that sustains their elite status Does the emergence of the international league tables pose a challenge to those responsible for governing elite institutions These are critical issues with which both policy makers and institutional leaders will have to grapple over the next ten years making Structuring Mass Higher Education a timely relevant and much needed text It will appeal to policy makers and practitioners within higher education as well as student and scholars worldwide

Transforming Universities in South Africa ,2020-08-31 The idea of transformation in higher education underpins all policy documents academic literature and on going debates in South Africa Transforming Universities in South Africa Pathways to Higher Education Reform responds to the pressing need to comprehensively review the post apartheid experience and assess where South Africa s higher education stands across the continent and globally particularly within the country s efforts to overcome decades of socio economic imbalances It addresses the question of whether South Africa s transformation strategy from apartheid to democracy was simply a symbolic new flag raising and new anthem singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally This volume s ultimate purpose is to provide a basis for imagining new futures in which South Africa higher education in the context of Africa and the global world takes centre stage
