

The Turbine Pilot's Flight Manual

THIRD EDITION

Gregory N. Brown
& Mark J. Holt

Everything a pilot is expected to know when transitioning to turbine-powered aircraft.

Whether you're preparing for turbine ground school, priming for a corporate or airline interview—or even if you're upgrading into your first personal jet or turboprop—*The Turbine Pilot's Flight Manual* is designed for you. With precision and a sense of humor, authors Greg Brown and Mark Holt cover all the basics for turbine pilot operations, clearly explaining the differences between turbine aircraft and their piston engine counterparts.

This manual clarifies the complex topics of turbine aircraft engines and all major power and airframe systems, subjects that are pertinent to flying bigger, faster, and more advanced aircraft. It includes discussions on high-speed aerodynamics, wake turbulence, coordinating multi-pilot crews, and navigating in high-altitude weather. You'll be introduced to state-of-the-art cockpit instrumentation including flight management systems (FMS), global navigation (GPS), and head-up guidance systems (HGS or HUD). You'll also learn the operating principles of hazard avoidance systems including weather radar, ground proximity warning systems (GPWS) and predictive wind shear systems (PWS).

This Third Edition of *The Turbine Pilot's Flight Manual* details the concepts and operational principles of the latest generation cockpit instrumentation, navigation (RNAV/RNP), and communications procedures and equipment (datalink and ADS-B) that are only just now becoming operationally available. Also, learn about the latest engine performance management techniques (such as reduced vs. derated thrust). Included are an updated glossary of airline and corporate aviation terminology, handy turbine pilot rules-of-thumb, and a comprehensive turbine aircraft "pilot's Guide." The authors clarify these complex topics with a wealth of illustrations, and additional information is available online where readers can access narrated color animations that make these systems easier than ever to understand.

Greg Brown's love of flying is obvious to anyone who knows his nickname, "Flying Carpet," an AOPA's Pilot Training magazine, or who has read his other books, *How Can I Fly the Safety Flight?*

Instructor, Jack Manning for Pilots, and *Flying Carpet: The Soul of an Airplane*. As the first ever master CFI, and awarded the 2000 National Flight Instructor of the Year, Greg holds an ATP certificate with Boeing 737 type rating, and flight instructor certificates with all fixed-wing aircraft ratings.

Mark J. Holt, a pilot for a major airline who has logged over 11,000 hours in his 19 years of flying, holds an ATP certificate with Boeing 737/767 and B747-400 as 11 type ratings, Flight Engineer (F4000),

and flightground instructor certificates. His professional flying career includes extensive flight and ground training experience and service as a check airman for a large regional airline. Mark is also co-author of *Jet Carrier Operations*.
