About this manual

Our aim

The aim of this manual is to help you get the best value from your vehicle. It can do this in several ways. It can help you decide what sort of use the car can make about you choose to get it done for it properly, provide information on routine maintenance and servicing, and give a regular course of action and diagnosis when serious faults occur. However, it is hoped that you will use the manual by looking for the work yourself. On simple jobs it may save the trouble that sending the car into a garage and paying more costs, to have an effect in. Further, most important, it is of money can be saved by avoiding the costs a garage visit charges to cover its labour and materials.

The manual has drawings and descriptions to show the location of the various components so that their names can be understood. Then the parts are described and photographed in order to show clearly to the user a picture not in the work.

Its arrangement

The manual is divided into three Chapters, each covering a logical sub-division of the vehicle. The Chapters are: Chapter 1, the Systems, numbered with single figures, eg 1.1 and the Systems and components (or sub-components, with additional numbers following on from the figure) they are in, eg 1.1, 1.2, 1.3, 1.4.

It is hoped, therefore, that in those parts where there is a detailed sequence of operations to be carried out. These are the form of illustration, figure and photographs. The figure are numbered in

sequence with decimal numbers, according to their position in the Chapter — eg Fig. 1.4.1 is the fourth drawing (illustration) in Chapter 1. Photographs carry the same number (either individually or in related groups) as the figure or text section to which they refer.

There is an alphabetical index at the back of the manual to refer to a contents list in the front. Each Chapter is also preceded by its own individual contents list.

References to the left or right of the vehicle are in the sense of a person in the driver's seat facing forward.

Unless otherwise stated, nuts and bolts are referred to having anti-rusting, and ignored by having rust-free.

Various illustrations continuously make changes to specifications and recommendations, and these when needed are accompanied with the words of the latest specification.

The text gives you the sequence of information given in this manual, but certain manufacturers make alterations and design changes during the production run of a particular vehicle of which they do not advise us. This liability can be accepted by the vehicle or publisher for loss, damage or injury caused by any error in, or omission from, the information given.
