Description

The machine is a four-wheel drive loader with articulated frame-steering.

The engine is a six-cylinder, four-stroke direct-injection turbocharged diesel engine type TD63K8E (L90C), TD73KDE (L120C). The transmission is hydro-mechanical, where all gears are in constant mesh, with the designation HT131 for L90C and HT205 for L120C.

Between engine and transmission there is a single stage hydraulic torque converter.

The front and rear axles have fully floating drive shafts with planetary gears in the wheel hubs. The front axle is provided with a differential lock.

The service brakes are of the disc brake type running in oil, built integrally with the planetary gear of each wheel hub. The parking brake on L90C is of the disc brake type and is positioned externally on the transmission output shaft. The parking brake on L120C is of the disc brake type running in oil and is positioned internally on the transmission output shaft. The steering system is hydrostatic with a variable load-sensing axial piston pump and two hydraulic cylinders (steering cylinders). For further description of function and components, see the respective sections.
