* Power ratings – see Technical Data

The MD22L is a marine engine of advanced design manufactured from quality components and designed to fulfil customer requirements.

Service Life

The MD22L is fitted with freshwater cooling as standard. This reduces internal corrosion and enables the engine to maintain a consistent and optimal working temperature under all conditions.

Comfort

Smooth running with very low vibration levels results from a dynamically balanced design and high efficiency rubber insulation.

The engine's high torque provides excellent operating characteristics to aid maneuvering, particularly in confined spaces.

Additional on board comfort features are available from an extensive range of matched accessories.

Environment

The engine's direct injection and advanced combustion system ensure high efficiency and low fuel consumption, which minimize noxious exhaust emissions and enhance overall enjoyment of boating.

Transmissions

For increased flexibility, in both design and installation, the following complete matched transmission units are available:

- HS25A, MS25A and MS25L reverse gears, both down angle and straight
- 120S – the exceptionally smooth and quiet sail drive, also allowing the engine to be installed in reverse position using a kit.

All units are built for durability and smooth operation.

MD22L with 120S
S-drive

The engine illustrated may not be entirely identical to production standard engines.
