Trading Tactics in the Financial Market Don K. Mak,2021-07-29 Financial markets are not predictable let alone controllable The one thing traders and investors can control is their trading tactics where some can have higher probability of profitability than others This book explains by using phase analysis why some of the indicators and trading tactics would

work better than others and why some indicators and trading tactics would perform poorly Emphasis is placed on Awesome Oscillator and Accelerator Oscillator which are based on Simple Moving Average a popular tool employed by traders They are then compared to Moving Average Convergence Divergence MACD and MACD Histogram MACDH which are based on exponential moving averages By varying the parameters of MACD and MACDH one can change the phase or time delay and possibly make a larger profit This book is for practitioners and includes all MATLAB programs used in the book
