Clement,2012 **Advances in Signal Processing and Intelligent Recognition Systems** Sabu M. Thampi,Alexander Gelbukh,Jayanta Mukhopadhyay,2014-02-14 This edited volume contains a selection of refereed and revised papers originally presented at the International Symposium on Signal Processing and Intelligent Recognition Systems SIRS 2014 March 13 15 2014 Trivandrum India The program committee received 134 submissions from 11 countries Each paper was peer reviewed by at least three or more independent referees of the program committee and the 52 papers were finally selected The papers offer stimulating insights into Pattern Recognition Machine Learning and Knowledge Based Systems Signal and Speech Processing Image and Video Processing Mobile Computing and Applications and Computer Vision The book is directed to the researchers and scientists engaged in various field of signal processing and related areas Developing a Keyword Extractor and Document Classifier: Emerging Research and Opportunities Paul, Dimple Valayil,2021-01-08 The main problems that prevent fast and high quality document processing in electronic document management systems are insufficient and unstructured information information redundancy and the presence of large amounts of undesirable user information The human factor has a significant impact on the efficiency of document search An average user is not aware of the advanced option of a query language and uses typical queries

Development of a specialized software toolkit intended for information systems and electronic document management systems can be an effective solution of the tasks listed above. Such toolkits should be based on the means and methods of automatic keyword extraction and text classification. The categorization or classification of texts into predefined categories has witnessed a booming interest in the last 10 years due to the increased availability of documents in digital form and the ensuing need to organize them. Thus research on keyword extraction advancements in the field and possible future solutions is of great importance in current times. Developing a Keyword Extractor and Document Classifier Emerging Research and Opportunities presents an information extraction mechanism that can process many kinds of inputs, realize the type of text and understand the percentage of the keywords that has to be stored. This mechanism then supports information extraction and information categorization mechanisms. This module is used to support a text summarization mechanism which leads with the help of the keyword extraction module to text categorization. It employs lexical and information retrieval techniques to extract phrases from the document text that are likely to characterize it and determines the category of the retrieved text to present a summary to the users. This book is ideal for practitioners, stakeholders, researchers, academicians, and students who are interested in the development of a new keyword extractor and document classifier method.
