Exploring Gender and Sex Differences in Behavioral Dyscontrol: from Drug Addiction to Impulse Control Disorders Liana

Fattore, Miriam Melis, 2016-04-13 Males and females exhibit discrete attitudes and skills experience dissimilar emotional and psychological needs and react differently to peer pressure lack of self realization or other personal and social expectations In addition they are differently influenced by family history and diverge in the perception of self image and health risks To complicate the matter on gender dichotomy male testosterone levels markedly vary over the course of the day while female levels of sex hormones significantly fluctuate depending upon the menstrual cycle the pre or post menopausal age and the use of oral contraceptives All of these factors interact with genetic background and sex hormonal fluctuations and determine the differences observed in their predisposition to develop an addiction This term is traditionally associated to the abuse of legal and illegal substances However a compulsion toward the engagement in a non drug related rewarding behavior usually involving a natural reward also activates the brain reward system and engenders persistent behavior thus resulting in a diminished control over it These latter behaviors are defined as behavioral addictions This definition encompasses any behavior characterized by the followings i feeling of tension or arousal before the action ii gratification and or relief at the time of performing the act iii inability to resist an urge or drive even against great obstacles or dangers iv absence of consideration for the negative consequences that may affect family friends and or work As such behavioral addictions include compulsive food intake and sexual activity pathological gambling and Internet addiction excessive exercising compulsive buying and pyromania These behaviors which are often classified as impulse control disorders result in actions that are

harmful to oneself and/or others share common features e.g. compulsiveness, impulsivity, impaired decision making, craving, tolerance, withdrawal, high rates of relapse and involve dysfunction of several brain circuits. Derangement from functional neurobiological mechanisms underpinning both sensitivity to reward and inhibitory control can also lead to compulsive behaviors. For instance, pathological gambling and other impulse control disorders e.g. hypersexuality, compulsive painting, eating and buying are often reported in Parkinson's disease patients. Gender-dependent differences in the rate of initiation and frequency of misuse of addicting drugs have been widely described. Yet men and women also differ in their propensity to become addicted to other rewarding stimuli e.g. sex, food or activities e.g. gambling, exercising. The goal of the present Research Topic is to explore and summarize current evidence for gender and sex differences not only in drug addiction but also in other forms of addictive behaviors. Thus it will include studies showing gender-dependent differences in drug addiction, food addiction, compulsive sexual activity, pathological gambling, Internet addiction and physical exercise addiction. Psychiatric comorbidity, potential risk factors and the underlying neural mechanisms will be also examined with particular emphasis to the role of sex hormones in modulating addictive and compulsive behaviors.

[More Precious Than Pixels](#) Hope Quartuccio, 2025-11-11 Are you struggling to find help and hope after discovering your partner's pornography habit? Do you feel lost and confused about who you are and what this means for your relationship? Has your faith been downplayed and used against you? Discovering a loved one's addiction to pornography challenges everything we once believed about ourselves and our marriage. The betrayal is physical, emotional and deeply personal. We question our worth, our beauty and even our faith. What if the truth was that there was never anything wrong with us at all? Through honest testimony and Scripture-based insights, this book invites the reader to step out of shame and worthlessness and into the light of God's truth. With honest reflection and unassuming guidance, Hope Quartuccio offers a path toward healing and purpose. Find strength in the Word and clarity in understanding that pornography is a spiritual and psychological battle, not a reflection of your value. Release anger, rebuild your faith and walk in the freedom of grace. This book is not about surviving someone else's addiction; it is about rediscovering who you are in Christ. You are seen. You are loved. You are not alone. Allow God to heal and restore what darkness tried to steal from your heart.

[Wanderlust](#) Stephen Peter Anderson, 2019-07-14 There is an entire generation whose brains are permanently shaped by unrealistic standards of beauty, fostering unwanted sexual conditioning that governs their intimate behaviours. Lust, not love, is rendering millions unprepared for relationships, marriage and parenthood in an unmonitored, hypersexual virtual world. But what if freedom from these unhealthy social mores meant unlearning what you've already learned? For more than two decades, Stephen Peter Anderson experienced how his unrealistic and unattainable ideas of beauty unknowingly shaped his sexual conditioning. His odyssey is more than a struggle with overcoming a distorted representation of sex; it is a fight for reclamation. *Wanderlust* is not just an intensely personal story but a journey of self-discovery in relearning how to attain the glory and beauty of love that God intended. In this MeToo era, there could hardly be
