Writing and Power Candace Mitchell, 2015-12-03 This book offers a much needed alternative to the more traditional texts used to teach writing instruction Grounded in history the book clarifies changing theoretical and practical approaches to teaching writing critically assessing each approach in relation to the social and political movements of the day both within and beyond the university The author takes us inside the real world of writing instruction not only from the viewpoint of instructor but as seen through the eyes of students struggling to make sense of the expectations of writing class Mitchell emphasizes that writing entails far more than putting words to paper and delves into contextually variable culturally defined expectations that include multiple linguistic forms both oral and written highlighting the complexity of writing while engaging the reader in lively academic debates about language and society Logical Argument in the Research Paper Russ Ward, 1997 Logical Argument in the Research Paper operate on the premise that collegiate level writing when cast in its most significant and sophisticated form is argumentative Students are shown how writers examine a potential topic establish a stance upon that topic defend the stance avoid reasoning and ethical errors and in general say something meaningful about the topic It also includes instruction about finding sources gathering information from them and correctly documenting them However the emphasis remains on how effective writers evaluate sources think about the information they discover prepare a fair and informed argument rethink and revise the argument and finally present an argument in its completed form Logical Argument in the Research Paper will help students learn some of the reasoning processes that all writers use when composing the academic argument

Reading and Writing for Civic Literacy Donald Lazere, 2015-12-03. This brief edition of a groundbreaking textbook addresses the need for college students to develop critical reading, writing, and thinking skills for self-defense in the contentious arena of American civic rhetoric. Designed for first-year or more advanced composition and critical thinking courses, it is one-third shorter than the original edition, more affordable for students, and easier for teachers to cover in a semester or quarter. It incorporates up-to-date new readings and analysis of controversies like the growing inequality of wealth in America and the debates in the 2008 presidential campaign expressed in opposing viewpoints from the political left and right. Exercises help students understand the ideological positions and rhetorical patterns that underlie such opposing views. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.
