Operation Manual

Specifications and Functions of the Suzuki Diagnosis System

- (1) A. The dedicated software of this diagnosis system runs on a standard personal computer (PC) under Windows 7 and 8.
The PC-side software performs failure diagnosis by communicating with the onboard computer through SDS-II that translates and converts the signals from the PC via the dedicated communication cable.
B. The SDS-II-side software allows the SDS-II to perform failure diagnosis independently by communicating with the onboard computer via the dedicated communication cable.
C. Similar to B, the SDS-II-side software allows the SDS-II to record data independently by communicating with the battery via the battery cable, and with the onboard computer via the dedicated communication cable.
The above three software A, B, and C are available.
- (2) The SDS-II dedicated software is compatible with eleven languages: Japanese, English, French, German, Italian, Spanish, Greek, Portuguese, Chinese (simplified), Thai, and Indonesian.
- (3) To use the SDS-II software, activation is required using an access key that can be obtained by purchasing the license. Just installing the software does not allow you to use the software.
- (4) Data from various sensors at the time of engine start and stop can be displayed or graphed in real time, and the displayed data and graphs can be saved and printed out.
- (5) The types of data to be displayed can be selected.
- (6) Saved data can be redisplayed and graphed (only with the PC-side software).
- (7) Failure codes (past and present) recorded at the time of a failure can be called up and displayed.
Also, the record of changes in data (only two events) at the time of a failure can be displayed.
- (8) A **"Trigger"** can be set for data (only with the PC-side software). Trigger is a function that records data from the point when the preset value of one or more types of data is exceeded (or not met), or to record the failure code display timing on the monitoring graph screen.
- (9) The SDS-II can perform active control independently (resetting ISC learned values etc.).
- (10) With the data recorder function of C in (1), approx. 5,000 hours (varies with the model) of operation data or travel data can be recorded, read, and verified using an 4 GB SD card.
- (11) The diagnosis system requires the setup of additional functions and the use of dedicated connectors for the onboard ECU. The system supports new models, such as AN 650, introduced after May 2002 and does not support models that were produced prior to that time.

Medical Image Computing and Computer-Assisted Intervention - MICCAI

2002 Takeyoshi Dohi, Ron Kikins, 2003-06-30 The fifth international Conference in Medical Image Computing and Computer Assisted Intervention MICCAI 2002 was held in Tokyo from September 25th to 28th 2002 This was the first time that the conference was held in Asia since its foundation in 1998 The objective of the conference is to offer clinicians and scientists the opportunity to collaboratively create and explore the new medical field Specifically MICCAI offers a forum for the discussion of the state of art in computer assisted interventions medical robotics and image processing among experts from multi disciplinary professions including but not limited to clinical doctors computer scientists and mechanical and biomedical engineers The expectations of society are very high the advancement of medicine will depend on computer and device technology in coming decades as they did in the last decades We received 321 manuscripts of which 41 were chosen for oral presentation and 143 for poster presentation Each paper has been included in these proceedings in eight page full paper format without any differentiation between oral and poster papers Adherence to this full paper format along with the increased number of manuscripts surpassing all our expectations has led us to issue two proceedings volumes for the first time in MICCAI s history Keeping to a single volume by assigning fewer pages to each paper was certainly an option for us considering our budget constraints However we decided to increase the volume to offer authors maximum opportunity to argue the state of art in their work and to initiate constructive discussions among the MICCAI audience

Adopting the Melody of Expression: An Psychological Symphony within **Suzuki Diagnosis System Operation Manual**

In a world used by monitors and the ceaseless chatter of quick transmission, the melodic elegance and psychological symphony produced by the prepared word frequently fade into the background, eclipsed by the persistent noise and disruptions that permeate our lives. Nevertheless, nestled within the pages of **Suzuki Diagnosis System Operation Manual** a charming fictional value brimming with organic feelings, lies an immersive symphony waiting to be embraced. Constructed by an elegant musician of language, that charming masterpiece conducts visitors on an emotional journey, skillfully unraveling the hidden melodies and profound affect resonating within each carefully constructed phrase. Within the depths of this emotional analysis, we can discover the book is central harmonies, analyze its enthralling writing design, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
