“What Darwin Never Knew”

1. Darwin was offered a position on the **BEAGLE** whose mission was to survey the waters around South America.
2. Where did Darwin make his first important discovery? **ARGENTINA**
What did he find there? **Fossils** of extinct mammals.
3. The **GALAPAGOS** are home to animals found no-where else on earth. (Where Darwin made his most important discoveries.)
4. The upper **SHELL/CARAPACE**, **COLOR**, **LOWER SHELL/PLASTER** of the giant tortoises differed depending upon which island they lived.
5. The Galapagos **FINCHES** differed in the type of beak, depending on the island.
6. Darwin realized, for some reason, that species **CHANGE**.
7. Darwin studied dog breeders and how specific traits were selected. Darwin then wondered if **Natural selection** could be going on in life.
8. The pattern in nature that Darwin saw was that the creatures that survived were those best adapted to the specific **ENVIRONMENT** in which they lived.
9. The Galapagos finches have different beaks because the finches used their beaks as **TOOLS**.
10. Darwin realized that **VARIATION** was the start of change in nature.
11. Over many generations, tiny variations allow the fit to get fitter and the unfit to vanish.
This is evolution by **NATURAL SELECTION**.
12. In 1859 Darwin published ***The Origin of Species***.
13. Many genes get translated into **PROTEINS**.
14. DNA has one other vital quality. It doesn't stay the **SAME**.
15. Without **MUTATION**, everything would stay the same, generation after generation. We can now find the genes that are responsible for evolutionary change.
16. Humans have **23,000** genes. The same numbers as a chicken and less than an ear of corn.
Many of our key genes are similar to those other animals.
17. How do you get all these differences if you have the same number of genes? The first clues are from the study of **GENETICS/EMBRYOLOGY**. They are the platform of diversity and all use the same basic genes.
18. **98** percent of DNA doesn't code for proteins.

Debating Darwin Robert J. Richards, Michael Ruse, 2016-09-10 Two evolutionists debate the intellectual roots of Darwin's theories drawing connections to German Romanticism the Scottish Enlightenment and more Charles Darwin is an icon of modern science and his theory of evolution is commonly referenced by scientists and nonscientists alike Yet there is a surprising amount we don't know about the father of modern evolutionary thinking his intellectual roots or even the science he produced *Debating Darwin* brings together two leading Darwin scholars Robert J. Richards and Michael Ruse to engage in a spirited and insightful dialogue offering their interpretations of Darwin and their critiques of each other's thinking Examining key disagreements about Darwin that continue to confound even committed Darwinists Richards and Ruse offer divergent views on the man and his ideas Ruse argues that Darwin was quintessentially British part of an intellectual lineage tracing back to the Industrial Revolution and thinkers such as Adam Smith and Thomas Robert Malthus Ruse sees Darwin's work in biology as an extension of their theories In contrast Richards presents Darwin as more cosmopolitan influenced as much by French and German thinkers Above all argues Richards it was Alexander von Humboldt who gave Darwin the conceptual tools he needed to formulate his evolutionary hypotheses Together the authors show how these contrasting views on Darwin's influences can be felt in theories about the nature of natural selection the role of metaphor in science and the place of God in Darwin's thought The book concludes with a jointly authored chapter that brings this debate into the present focusing on human evolution consciousness religion and morality

Ten Cents for the World Leonard D. Dobson, 2010-05 Digital Imaging Making the Invisible Visible is the key to unlocking door where evil dwells No stone or molecule no place on Earth or Storm or far distant Planet has been left unturned in the author's quest to deliver the Truth with the Proof In this second book in the trilogy the author's burning passion to find photographic evidence of an Alien conspiracy that is mercilessly exploiting and infiltrating all aspects of life on earth comes shining through Some may say that only a fool would go in search of an evil that has wiped mankind off the face of the Earth five times previously But this story is a spirit inspired journey From ancient times of the Crucifixion to the cause of the H1N1 Bubonic Plague and its modern pandemic counterparts to the place where evil dwells to finding the Hidden Hand behind the Columbia Space Shuttle Disaster and the Concorde Paris Air Crash The author's findings discovered a new force in nature a show of strength that shocked a Nation and finally a journey that led him to the edges of the universe This trilogy of books warns the world of impending disaster as it sets out evidence for life forms from other dimensions including malevolent entities and describes the digital technique whereby this evidence is acquired When the shock of this reality subsides then and only then man will realise that he is not alone and never has been But will mankind survive 2012 to evolve and claim to its rightful place in the Greater Race of Species After all is it not possible that the earthly struggle for mankind is a spiritual pathway that binds us all in death as in life
