2022 WATER QUALITY REPORT

JMWSC System Number: 3220003 / Pelion System Number: 3210010

Public safety is our top priority, and there are measures of water quality assurance that JMWSC takes every day as a regular course of operation in our own system. Although these are standard processes for any water system, they are especially vital to us at JMWSC as we recognize that we are the direct connection between our customers and their drinking water. Our staff employs a variety of important steps on a regular schedule to keep us informed of the quality of water we supply to your tap. This includes collecting water samples for water quality testing, from locations across our system, routine system flushing, and regular tank maintenance.

***JMWSC is
committed to
delivering safe
drinking water to
our community.***

Coming in JMWSC's 2023 Report... Per- and polyfluoroalkyl substances (PFAS)

Per- and polyfluoroalkyl substances, PFAS for short, are a group of manufactured chemicals used in millions of products since the 1940's because of their heat, water, and stain resistance. There are thousands of different PFAS, and the EPA states about 80% of our PFAS exposure is from consumer products we use everyday, including:

- Food and food packaging, like fish from tainted waterways and food delivered in grease-resistant paper, fast food containers, microwave popcorn bags, pizza boxes, and candy wrappers.
- Household products like non-stick cookware, and stain and water-repellent carpets, upholstery, and clothing.
- Personal care products, including cosmetics, toilet paper, and specific brands of shampoos and dental floss.
- Fire extinguishing foam

About 20% of our exposure is from drinking water from public drinking water systems and private drinking water wells. Current research suggests that exposure to high levels of certain PFAS may lead to adverse health outcomes, and the EPA is currently reviewing recently proposed drinking water standards for these compounds. Meanwhile, research is still ongoing to determine if different exposure levels to different PFAS can lead to a variety of health effects over long periods of time. In the fall of 2023, JMWSC will conduct testing in compliance with the EPA's Fifth Unregulated Contaminant Monitoring Rule (UCMR 5), which established monitoring for 29 PFAS substances in the nation's drinking water. Those results will be reported in our 2023 Water Quality Report.
