Useful tips:

1. In case if mileage is written down in eeprom, and on the PCB there are more than one of the same type it is necessary to search for that which is more close to the display or the microprocessor.
2. Some chips have protection against reading, please use programmers which are able to bypass this protection.
3. After you have read dump from a memory chip please look on its content. If there are only zero's or FF's it means the dumps is wrong readed.
