Notes & Practice

Algebra 1

How to Graph a System of Linear Inequalities

1. Write each inequality in slope-intercept form so you know which way the inequality sign needs to go. Remember to flip the inequality sign when dividing both sides by a negative number.
2. Graph the lines. $<$ or $>$ inequalities need a _____ line, and $\leq$ or $\geq$ inequalities need a _____ line.
3. Determine which side of each line should be shaded. $<$ or $>$ inequalities shade _____ the line, and $\leq$ or $\geq$ shade _____ the line. You can use two different colors to show where the shading from each inequality overlaps, or just visually identify where the overlapping shaded region is located.

Graph each system of linear inequalities. (Don't forget to shade!)

1) $y < -\frac{1}{2}x + 2$
 $y \geq x - 2$

2) $2x + y < 3$
 $x + 2y \geq 4$

3) $y < 2x + 1$
 $y \geq \frac{1}{2}x - 2$

4) $3x + 2y < 14$
 $4x + 2y \geq 8$

Abstract For nearly 50 years Lyapunov inequalities have been an important tool in the study of differential equations In this survey building on an excellent 1991 historical survey by Cheng we sketch some new developments in the theory of Lyapunov inequalities and present some recent disconjugacy results relating to second and higher order differential equations as well as Hamiltonian systems 1 Introduction Lyapunov's inequality has proved useful in the study of spectral properties of ordinary differential equations Typical applications include bounds for eigenvalues stability criteria for periodic differential equations and estimates for intervals of disconjugacy

Analytic Inequalities and Their Applications in PDEs Yuming Qin, 2017-02-13 This book presents a number of analytic inequalities and their applications in partial differential equations These include integral inequalities differential inequalities and difference inequalities which play a crucial role in establishing uniform bounds global existence large time behavior decay rates and blow up of solutions to various classes of evolutionary differential equations Summarizing results from a vast number of literature sources such as published papers preprints and books it categorizes inequalities in terms of their different properties
