Tabulate Similarities Between Nsfas And Student Loan:

Private Student Loans Richard Cordray,2013-02-11 This report details the risky practices and debt that stemmed from the boom and bust of the private student loan market in the past ten years According to the report s estimates outstanding student loan debt in the U S topped 1 trillion in 2011 Students were yet another group of consumers that were hurt by the boom and bust of the financial crisis The report found that too many student loan borrowers were given loans they could not afford and sometimes for more money than they needed They are now overwhelmed by debt and regret the decisions they made There are striking similarities between stories of the private student loan market and stories of mortgage market in the years leading up to the financial crisis Before the financial crisis some lenders in both markets engaged in aggressive marketing and risky underwriting They also originated loans for immediate sale Not all lenders chose this path but enough did to produce a market wide trend Contents of this report Lenders Loan Markets and Products Borrower Characteristics and Behaviors Consumer Protection Fair Lending Issues Recommendations Student Loan Glossary Figures and tables This is a print on demand report

Choice Architecture Versus Price Xiaoling Ang,2016 We show that changes in choice architecture have a large effect on student loan decisions while we do not find significant effects of sizeable interest rate changes We evaluate the effect of two policies implemented in 2010 by the U S Department of Education 1 the requirement that all applicants for private student loans fill out a Self Certification Form which includes various disclosures about federal aid and 2 the prohibition of presenting a private student loan as a default option on a financial aid offer without disclosure of the relationship between the school and the creditor Using difference and difference and matching techniques on a proprietary dataset of private student loan originations from the Consumer Financial Protection Bureau and survey and administrative data from the Department of Education we show that these changes decreased private student loan originations by 33% at public four year institutions 18% at private not for profit four year institutions and 55% at four year for profit institutions In contrast we find no consumer response when analyzing 60 basis point decrease in the price of federal Parental PLUS loans at some schools using same datasets and similar estimation techniques
