Lyman,S. Prentice-Dunn,2013-06-29 Residential and inpatient treatment of children and adolescents is a field that is still in the process of defining itself and of demonstrating its effectiveness Because of the continuous nature of the field s development it is especially important that a broad range of its theoretical orientations and therapeutic techniques be considered and critically appraised Residential and inpatient treatment is unique in its potential for both positive and negative outcomes No other interventions can bring about the major changes in all aspects of a child s environment that inpatient hospitalization or residential treatment can These changes may result in rapid and significant improvements in a child s condition or they may conceivably lead to additional maladaptive behavioral patterns or inappropriate emotional and cognitive responses Therefore the obligation to consider the entire range of treatment alternatives and to empirically determine the effectiveness of specific interventions is particularly great Residential and inpatient treatment is also an expensive and limited resource and our wise utilization of it should be guided by a comprehensive
