Russia and the Wider World in Historical Perspective C. Brennan,M.

Frame,2000-03-01 This new collection of original essays by leading academics explores major issues in Russia's relations with the wider world since the seventeenth century The emphasis is not on Russian foreign policy per se but on the different levels of interaction between Russia its immediate neighbours and the wider global community including cultural political and economic relations The book has been produced in honour of the distinguished historian Professor Paul Dukes *Stalin* Stephen Kotkin,2018-11-20 Monumental The New York Times Book Review Pulitzer Prize finalist Stephen Kotkin has written the definitive biography of Joseph Stalin from collectivization and the Great Terror to the conflict with Hitler's Germany that is the signal event of modern world history In 1929 Joseph Stalin having already achieved dictatorial power over the vast Soviet Empire formally ordered the systematic conversion of the world's largest peasant economy into socialist modernity otherwise known as collectivization regardless of the cost What it cost and what Stalin ruthlessly enacted transformed the country and its ruler in profound and enduring ways Building and running a dictatorship with life and death power over hundreds of millions made Stalin into the uncanny figure he became Stephen Kotkin's *Stalin Waiting for Hitler* 1929 1941 is the story of how a political system forged an unparalleled personality and vice versa The wholesale collectivization of some 120 million peasants necessitated levels of coercion that were extreme even for Russia and the resulting mass starvation elicited criticism inside the party even from those Communists committed to the eradication of capitalism But Stalin did not flinch By 1934 when the Soviet Union had stabilized and socialism had been implanted in the countryside praise for his stunning anti capitalist success came from all quarters Stalin however never forgave and never forgot with shocking consequences as he strove to consolidate the state with a brand new elite of young strivers like himself Stalin's obsessions drove him to execute nearly a million people including the military leadership diplomatic and intelligence officials and innumerable leading lights in culture While Stalin revived a great power building a formidable industrialized military the Soviet Union was effectively alone and surrounded by perceived enemies The quest for security would bring Soviet Communism to a shocking and improbable pact with Nazi Germany But that bargain would not unfold as envisioned The lives of Stalin and Hitler and the fates of their respective dictatorships drew ever closer to collision as the world hung in the balance *Stalin Waiting for Hitler* 1929 1941 is a history of the world during the build up to its most fateful hour from the vantage point of Stalin's seat of power It is a landmark achievement in the annals of historical scholarship and in the art of biography The Landscape of Stalinism Evgeny Dobrenko,Eric Naiman,2011-11-15 This wide ranging cultural history explores the expression of Bolshevik Party ideology through the lens of landscape or more broadly space Portrayed in visual images and words the landscape played a vital role in expressing and promoting ideology in the former Soviet Union during the Stalin years especially in the 1930s At the time the iconoclasm of the immediate postrevolutionary years had given way to

nation building and a conscious attempt to create a new Soviet culture In painting architecture literature cinema and song images of landscape were enlisted to help mold the masses into joyful hardworking citizens of a state with a radiant utopian future all under the fatherly guidance of Joseph Stalin From backgrounds in history art history literary studies and philosophy the contributors show how Soviet space was sanctified coded and sold as an ideological product They explore the ways in which producers of various art forms used space to express what Katerina Clark calls a cartography of power an organization of the entire country into a hierarchy of spheres of relative sacredness with Moscow at the center The theme of center versus periphery figures prominently in many of the essays and the periphery is shown often to be paradoxically central Examining representations of space in objects as diverse as postage stamps a hikers magazine advertisements and the Soviet musical the authors show how cultural producers attempted to naturalize ideological space to make it an unquestioned part of the worldview Whether focusing on the new or the centuries old whether exploring a built cityscape a film documentary or the painting Stalin and Voroshilov in the Kremlin the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination Not all features of Soviet space were entirely novel and several of the essayists assert continuities with the prerevolutionary past One example is the importance of the mother image in mass songs of the Stalin period another is the boundless longing inspired in the Russian character by the burden of living amid vast empty spaces But whether focusing on the new or the centuries old whether exploring a built cityscape a film documentary or the painting Stalin and Voroshilov in the Kremlin the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination

Essays in the History of Linguistics E. F. K. Koerner, 2004-01-01 The present volume follows the author's tradition of bringing together at certain intervals selections of articles which more often than not had previously been published in not easily accessible places or which had not been published before These papers do not typically represent mere reprints but in most instances thoroughly revised versions This volume contains twelve articles organized under three headings Programmatic Papers in the History of Linguistics Studies in Linguistic Historiography and Sketches historiographical and auto biographical plus as an appendix a complete list of Zellig Harris writings as an illustration of Koerner's penchant for and belief in the importance of good bibliographies as a basis for historical research While the first two sections which take up the bulk of the volume either show the author as an historian engage or demonstrate his work as a historiographer of 19th and 20th century linguistics the third section is much shorter and less heavy going Indexes of Biographical Names and of Subjects Terms Languages round out the volume which also contains a number of portraits of linguists and other illustrations

Isaac and Isaiah David Caute, 2013-08-06 Rancorous and highly public disagreements between Isaiah Berlin and Isaac Deutscher escalated to the point of cruel betrayal in the mid 1960s yet surprisingly the details of the episode have escaped historians scrutiny In this

gripping account of the ideological clash between two of the most influential scholars of Cold War politics David Caute uncovers a hidden story of passionate beliefs unresolved antagonism and the high cost of reprisal to both victim and perpetrator Though Deutscher 1907 1967 and Berlin 1909 1997 had much in common each arrived in England in flight from totalitarian violence quickly mastered English and found entry into the Anglo American intellectual world of the 1950s Berlin became one of the presiding voices of Anglo American liberalism while Deutscher remained faithful to his Leninist heritage resolutely defending Soviet conduct despite his rejection of Stalin s tyranny Caute combines vivid biographical detail with an acute analysis of the issues that divided these two icons of Cold War politics and brings to light for the first time the full severity of Berlin s action against Deutscher

Aleksandr Rodchenko Aglaya K. Glebova,2022-01-01 Through the lens of Aleksandr Rodchenko s photography a new and provocative understanding emerges of the troubled relationship between technology modernism and state power in Stalin s Soviet Union Tracing the shifting meanings of photography in the early Soviet Union Aglaya K Glebova revises the relationship between art and politics during what is usually considered the end of the critical avant garde Aleksandr Rodchenko 1891 1956 was a highly versatile Russian artist and one of Constructivism s founders His photographic work between 1928 when Stalin rose to power and the late 1930s reveals a wide ranging search for a different pictorial language in the context of the extreme transformations carried out under the Five Year Plans In response to forced modernization Rodchenko s photography during this time questioned his own modernist commitments At the heart of this argument is Rodchenko s infamous 1933 photo essay on the White Sea Baltic Canal site of one of the first gulags Glebova s careful reading of Rodchenko s oeuvre yields a more diverse practice than has been generally acknowledged and brings to light new aspects of his work in adjacent media including the collaborative design work he undertook with Varvara Stepanova
