Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching

White, 2012-11-02 The Founders of this nation believed that the government they were creating required a civically educated populace Such an education aimed to cultivate enlightened informed and vigilant citizens who could perpetuate and improve the nation Unfortunately America s contemporary youth seem to lack adequate opportunities if not also the ability or will to critically examine the foundations of this nation An even larger problem is an increasing ambivalence toward education in general Stepping into this void is a diverse group of educators intellectuals and businesspeople brought together in Civic Education and the Future of American Citizenship to grapple with the issue of civic illiteracy and its consequences The essays edited by Elizabeth Kaufer Busch and Jonathan W White force us to not only reexamine the goals of civic education in America but also those of liberal education more broadly
