Commedia dell'Arte of Flaminio Scala Richard Andrews, 2008-10-17 The Commedia dell Arte of Flaminio Scala presents a translation and commentary of selected scenarios composed or collected by the actor manager Flaminio Scala that were first published in 1611 Thirty of Scala's 50 scenarios are included complete with a detailed scene by scene analysis that demonstrates the methodology of Italian improvised theatre in the early modern period for the purposes of study as well as re creation Taking into consideration previous translations of the work Richard Andrews's English translation and lengthy analytic commentary of the scenarios provide an overview of the commedia dell arte style describing how actors fleshed out scenes by inserting existing material from their repertoire into a plot framework and demonstrating a constant interchange of plot characterization and scene structure that moved between scripted and improvised comedy Andrews points out similarities between the scenarios borrowings from earlier Italian scripted comedies analogies with other early modern drama including Shakespeare and the re use of these components by later dramatists such as Moliere and Goldoni An extensive introduction sets the parameters for the commentaries giving a description of commedia dell arte as a phenomenon explaining the categories of masked characters and describing the nature and structure of the genre A comprehensive index is organized for quick reference and lists which characters and masks appear in which scenarios as well as frequent scenic components that recur such as types of speeches relationships and emotional situations

Parallel Computing for Bioinformatics and Computational Biology Albert Y. Zomaya, 2006-04-21 Discover how to streamline complex bioinformatics applications with parallel computing This publication enables readers to handle more complex bioinformatics applications and larger and richer data sets As the editor clearly shows using powerful parallel computing tools can lead to significant breakthroughs in deciphering genomes understanding genetic disease designing customized drug therapies and understanding evolution A broad range of bioinformatics applications is covered with demonstrations on how each one can be parallelized to improve performance and gain faster rates of computation Current parallel computing techniques and technologies are examined including distributed computing and grid computing Readers are provided with a mixture of algorithms experiments and simulations that provide not only qualitative but also quantitative insights into the dynamic field of bioinformatics Parallel Computing for Bioinformatics and Computational Biology is a contributed work that serves as a repository of case studies collectively demonstrating how parallel computing streamlines difficult problems in bioinformatics and produces better results Each of the chapters is authored by an established expert in the field and carefully edited to ensure a consistent approach and high standard throughout the publication The work is organized into five parts Algorithms and models Sequence analysis and microarrays Phylogenetics Protein folding Platforms and enabling technologies Researchers educators and students in the field of bioinformatics will discover how high performance computing can enable them to handle more complex data sets gain deeper insights and make new discoveries

A Narrative Approach to Social Media Mourning Korina Giaxoglou, 2020-06-04 This book investigates how social media are reconfiguring dying death and

mourning Taking a narrative approach it argues that dying death and mourning are shared online as small stories of the moment which are organized around transgressive moments and events with motivational participatory or connective scope Through the different case studies discussed this book presents an empirical framework for analyzing small stories of dying death and mourning as practices of sharing which become associated with specific modes of affective positioning i e modulations of different degrees of distance or proximity to the death event and the dead the networked audience s and the affective self The book calls for the study of affect as integral to narrative activity and opens up broader questions about how stories and emotion are mobilized in digital cultures for accruing audiences value social or economic and visibility It will be of interest to researchers in narrative analysis the anthropology and sociology of emotion digital communication media and cultural studies and digital death and dying
