On Integrating Unmanned Aircraft Systems into the National Airspace System Konstantinos Dalamagkidis, Kimon P. Valavanis, Les A. Piegl, 2008-11-14 Commercial interest for unmanned aircraft systems UAS has seen a steady increase over the last decade Nevertheless UAS operations have remained almost exclusively military This is mainly due to the lack of a regulatory framework that allows only limited public and civil UAS operations with usually crippling restrictions Although efforts from the Federal Aviation Administration and its partners are already underway to integrate UAS in the National Airspace System NAS the appropriate regulation will not be ready for several more years In the meantime UAS developers need to be aware of the current operational restrictions as well as make informed decisions on their research and development efforts so that their designs will be airworthy when the regulatory framework is in place This monograph aims to present an overview of current aviation regulation followed by an investigation of issues and factors that will affect future regulation **Federal Register** ,2014 *Unmanned Aircraft Systems* Ella Atkins, Anibal Ollero, Antonios Tsourdos, 2017-01-17 UNMANNED AIRCRAFT SYSTEMS UNMANNED AIRCRAFT SYSTEMS An unmanned aircraft system UAS sometimes called a drone is an aircraft without a human pilot on board instead the UAS can be controlled by an operator station on the ground or may be autonomous in operation UAS are capable of addressing a broad range of applications in diverse complex environments Traditionally employed in mainly military applications recent regulatory changes around the world are leading to an explosion of interest and wide ranging new applications for UAS in civil airspace Covering the design development operation and mission profiles of unmanned aircraft systems this single comprehensive volume forms a complete stand alone reference on the topic The volume integrates with the online Wiley Encyclopedia of Aerospace Engineering providing many new and updated articles for existing subscribers to that work The chapters cover the following items Airframe configurations and design launch systems power generation propulsion Operations missions integration issues and airspace access Coordination multivehicle cooperation and human oversight With contributions from leading experts this volume is intended to be a valuable addition and a useful resource for aerospace manufacturers and suppliers governmental and industrial aerospace research establishments airline and aviation industries university engineering and science departments and industry analysts consultants and researchers *Advances in Aircraft Landing Gear* Robert Kyle Schmidt, 2015-08-24 The aircraft landing gear system is relatively unique on board an aircraft it is both structure and machine supporting the aircraft on the ground yet providing functions such as energy absorption during landing retraction steering and braking *Advances in Aircraft Landing Gear* is a collection of eleven hand picked technical papers focusing on the significant advancements that have occurred in this field concerning numeric modeling electric actuation and composite materials Additionally papers discussing self powered landing gear and more electrical overall aircraft architectures have been included The content of *Advances in Aircraft Landing Gear* is divided into two sections

Analysis and Design Methods and Electric Actuation Control and Taxi For those looking for more information on aircraft landing gears the SAE A 5 committee the Aerospace Landing Gear Systems Committee which meets twice a year serves as a useful forum for discussion on landing gear issues and development A current listing of documents produced and maintained by this committee appears in the appendix

Structural Health Monitoring Alessandro Pegoretti, 2018-11-20 Structural Health Management SHM is a key part of the Integrated Vehicle Health Management IVHM approach whose main aim is to develop an integrated end to end system to monitor the overall health of a vehicle Structural Health Monitoring Current State and Future Trends edited by Professor Alessandro Pegoretti a scholar from the University of Trento in Italy introduces the reader to recent developments involved in health monitoring of aerospace structures The chapters represented by seminal SAE International technical papers offer an overview of the most recent advances in the sensing techniques for SHM analysis of SHM data and its applications in aerospace SHM can allow a continuous in service inspection of the vehicle thus reducing the cost associated with manual inspection at predetermined time intervals The availability of reliable information on the loading conditions and health state of structural components by the implementation of SHM can be beneficial for several reasons such as To prevent catastrophic failure To reduce the number and the cost of unnecessary inspections To improve the design of structural parts with a reduction of the weight and the costs of overdesigned components Structural Health Monitoring Current State and Future Trends offers a unique perspective on this field
