There Will Come Soft Rains Comprehension Test:

Building Comprehension in Every Classroom Rachel Brown, Peter Dewitz, 2013-10-09 This book presents a practical model and specific unit and lesson planning ideas for enhancing students reading comprehension in any 2-8 classroom. The authors provide innovative suggestions that help teachers construct a comprehension curriculum organized around literature, informational texts, or a basal reading program. Vivid case examples and vignettes bring to life ways to build the knowledge, strategies, and motivation that children need to engage with different types of texts and become proficient, enthusiastic readers. Graphic elements throughout the volume link instructional and assessment practices directly to the Common Core standards. Technology Priscilla Norton, Karin M. Wiburg, 2003 The distinctive characteristic of *TEACHING WITH TECHNOLOGY* Second Edition is its clear correlation between theory and practice. This text focuses on ways to use technology to foster learning in K-12 classrooms instead of presenting the mechanics of computer operation. Norton and Wiburg's chapters are not based on computer applications; they are based instead on how technology can support student acquisition of literacy, content knowledge, problem solving, participating in communities, and student utilization of information and systems of assessment.
