for a full five minutes and there's no explanation. Utilities across the Western states cease functioning and all telecommunications abruptly stop with devastating consequences. This is not the work of a clever hacker although Washington worried about a panic assures the public it is. Only the enormous power and speed of a DNA computer could have caused such havoc. Under the cover of visiting his friend Marty Zellerbach who was severely injured when the Pasteur lab was destroyed, Covert One agent Jon Smith flies to Paris to search for the connection between the Pasteur explosion and the forces now wielding the computer. Following a trail that leads him across two continents, Smith uncovers a web of deception that threatens to wreck havoc and forever reshape the world.
