Homesick Lyla Yastion,2018-09-15 Human induced climate change is emerging as the most critical issue of the modern era Ninety seven percent of climate scientists now confirm that human extraction and burning of fossil fuels along with rampant deforestation is causing a rapid build up of carbon dioxide and other greenhouse gases in air and water These emissions heat up the planet and may be pushing Earth s capacity beyond the threshold at which equilibrium can be restored Global warming is sustained by a global capitalist economy dependent upon the fossil fuel industry and agribusiness both of which are unsustainable The toxic effects of air pollution ocean acidification and soil degradation are harming the health of all species Through an interdisciplinary approach that brings in the perspectives of the physical sciences psychology anthropology economics cultural history and spirituality Homesick investigates the evolutionary path by which human beings have arrived at this precarious juncture It proposes that this perilous detour in human cultural evolution arises from a fallacious belief that the human species unlike other species is not bound by ecological laws but has a special right to control and master the natural world Human beings suffer from the illusion that they are separate from the Earth their planetary home which is perceived as an object a commodity to exploit through technology They have forgotten what indigenous peoples still remember humanity is part of not apart from the natural world Homesick argues that cultural transformation towards a sustainable future is possible when human beings reawaken to Nature as partner and provider As memory of their embeddedness in the natural world is aroused they will experience love and respect for the interdependent web of life that sustains them This reawakening incrementally induces a radical change in thinking within society and sets in motion a paradigm shift Cultural institutions are then reshaped to match this new benign worldview

Six Stages on the Spiritual Path Ruth Whitney,2021-05-21 In *Six Stages on the Spiritual Path* we learn about spirituality and its stages as well as how spirituality helps to reduce our suffering and create more love Writings from ancient to contemporary mystics across the world provide us with practical and spiritual wisdom that will make our lives happier and more loving In the first stage on the mystic way children experience awe and wonder but they do not realize that this is a spiritual experience While all indigenous people recognize awe as a mystical experience only some adults and most artists do When parents and religious leaders teach children about God they

cause their spiritual growth to flourish or to become stunted at an elementary school level Awakening is an experience of the Divine that helps us realize that the Sacred Spirit is within us and loves us Awakening produces love for our neighbors and ourselves Then love nurtures more awakenings Illumination and union are deeper mystical experiences that the Holy One is not only within all of us and all of creation but also that we are within the ONE Illumination creates more love for all people and all the universe **The Art and Science of Change** , 2013: the End of Days or a New Beginning?
