Throughout the previous century college and university institutions have established child development laboratory schools. In the early 1900s they were initially considered to be sites for the recent discipline of child study but their purposes have progressed gradually. They also have assumed a fundamental function in promoting teaching research and service such as outreach engagement practice in child development and early childhood education. However a lot of them had to struggle for their survival when economic periods turned out to be problematic. Several extended operating programs were discontinued. Barbour McBride 2017. In 1894 John Dewey founded the University of Chicago Laboratory School. His laboratory school is unquestionably the most well known of experimental schools. It was used to research develop and confirm innovative theories and principles of child development and education. Later at the beginning of the early 1900s exemplary schools were developed as important centers for the preparation of teachers. Dewey's laboratory school and the preparation of interns in a hospital were used as a model for laboratory schools to focus on methodical research, dual faculty university appointments and the preparation of preservice teachers. During the initial half of the 20th century laboratory schools increased in colleges and universities especially between 1920 and 1940. University based child development laboratory programs assumed a critical responsibility in contributing to the knowledge base on child development and early childhood education as well as the professional development of early childhood educators. This concept of the child development laboratory schools has heavily influenced modern views. Researchers and educators need to understand the current sources based on theoretical frameworks that contribute to the purposes of the child development laboratory schools. The contents of the volume reflect the major shifts in the views of early childhood researchers and educators in relation to the research on child development laboratory schools, the role of child development laboratory programs in early childhood education and their relationship to theory research and practice.
