guidelines for choosing a substitute organic solvent that is safer to use Do you need an effective cheap but perhaps temporary way to reduce exposures before you can convince your employer to spend money on a long term or more reliable solution Do you need information about local exhaust ventilation or personal protective equipment like respirators and gloves Industrial Hygiene Control of Airborne Chemical Hazards provides the answers to these questions and more Science based and quantitative the book introduces methods for controlling exposures in diverse settings focusing squarely on airborne chemical hazards It bridges the gap between existing knowledge of physical principles and their modern application with a wealth of recommendations techniques and tools accumulated by generations of IH practitioners to control chemical hazards Provides a unique comprehensive tool for facing the challenges of controlling chemical hazards in the workplace Although William Pependorf has written the book at a fundamental level he assumes the reader has some experience in science and math as well as in manufacturing or other work settings with chemical hazards but is inexperienced in the selection design implementation or management of chemical exposure control systems Where the book is quantitative of course there are lots of formulae but in general the author avoids vague notation and long derivations Industrial Hygiene Control of Airborne Chemical Hazards, Second Edition William Pependorf, 2019-06-26 Are you a practicing occupational hygienist wondering how

to find a substitute organic solvent that is safer to use than the hazardous one your company is using Chapter 6 is your resource Are you a new hygienist looking for an alternative technology as a nonventilation substitute for an existing hazard Chapter 8 is your resource Are you looking for an overview of ventilation Chapters 10 and 11 are your resource Are you an industrial hygiene student wanting to learn about local exhaust ventilation Chapters 13 through 16 are your resource Are you needing to learn about personal protective equipment and respirators Chapters 21 and 22 are your resources This new

edition brings all of these topics and more right up to date with new material in each chapter including new governmental regulations While many of the controls of airborne hazards have their origins in engineering this author has been diligent in explaining concepts writing equations in understandable terms and covering the topics of non ventilation controls both local exhaust and general ventilation and receiver controls at the level needed by most IHs without getting too advanced Taken as a whole this book provides a unique comprehensive tool to learn the challenging yet rewarding role that industrial hygiene can play in controlling airborne chemical hazards at work Most chapters contain a set of practice problems with the solutions available to instructors Features Written for the novice industrial hygienist but useful to prepare for ABIH certification Explains engineering concepts but requires no prior engineering background Includes specific learning goals that differentiate the depth of learning appropriate to each topic within the fuller information and explanations provided for each chapter Contains updated governmental regulations and abundant references Presents a consistent teaching philosophy and approach throughout the book Deals with both ventilation and non ventilation controls DHHS Publication No. (NIOSH).,1973 **Student Guide for Workplace Monitor Training: Specific hazards monitoring**,1985 Toxic Chemicals in the Workplace T.
