The Strange Bird Jeff VanderMeer, 2017-08-01

The Strange Bird from New York Times bestselling novelist Jeff VanderMeer is a novella length digital original that expands and weaves deeply into the world of his thorough marvel of a novel Borne The Strange Bird is a new kind of creature built in a laboratory she is part bird part human part many other things But now the lab in which she was created is under siege and the scientists have turned on their animal creations Flying through tunnels dodging bullets and changing her colors and patterning to avoid capture the Strange Bird manages to escape But she cannot just soar in peace above the earth The sky itself is full of wildlife that rejects her as one of their own and also full of technology satellites and drones and other detritus of the human civilization below that has all but destroyed itself And the farther she flies the deeper she finds herself in the orbit of the Company a collapsed biotech firm that has populated the world with experiments both failed and successful that have outlived the corporation itself a pack of networked foxes a giant predatory bear But of the many creatures she encounters with whom she bears some kind of kinship it is the humans all of them now simply scrambling to survive who are the most insidious who still see her as simply something to possess to capture to trade to exploit Never to understand never to welcome home With The Strange Bird Jeff VanderMeer has done more than add another layer a new chapter to his celebrated novel Borne He has created a whole new perspective on the world inhabited by Rachel and Wick the Magician Mord and Borne a view from above of course but also a view from deep inside the mind of a new kind of creature who will fight and suffer and live for the tenuous future of this world Praise for Borne Jeff VanderMeer s Southern Reach Trilogy was an ever creeping map of the apocalypse with Borne he continues his investigation into the malevolent grace of the world and it s a thorough marvel Colson Whitehead VanderMeer is that rare novelist who turns to nonhumans not to make them approximate us as much as possible but to make such approximation impossible All of this is magnified a hundredfold in Borne Here is the story about biotech that VanderMeer wants to tell a vision of the nonhuman not as one fixed thing one fixed destiny but as either peaceful or catastrophic by our side or out on a rampage as our behavior dictates for these are our children born of us and now to be borne in whatever shape or mess we have created This coming of age story signals that eco fiction has come of age as well wilder more reckless and more breathtaking than previously thought a wager and a promise that what emerges from the twenty first century will be as good as any from the twentieth or the nineteenth Wai Chee
