Historically, the career development literature has been viewed either from the perspective of the individual (how to build a career) or from an economic perspective (how an organization benefits from developing employees). In this book, McDonald and Hite bring together the strengths of both traditions, offering an integrated framework for career development. The theoretical foundation expands on the counseling literature by incorporating the literature from human resource development and related fields. The application section reflects on the wide range of ages and working options that characterize the current and future workplace. The final section of the book addresses career development issues such as managing a diverse global workforce, ethics, and work-life balance. This book will help prepare human resource development students, scholars, and practitioners to develop and maintain successful career development programs and to foster more innovative research that advances the discourse.

**Leadership and Cultural Change** Ramona Houmanfar, Mark Mattaini, 2018-10-16 Contemporary confluences of leadership, decision making, and citizenship behavior often unintentionally contribute to the depletion of the world's resources, escalating health, education, and social crises, as well as community, societal, and cultural struggles to adapt to emerging global shifts. Leadership and management practices in this context affect the wellbeing of organizational members (e.g., their safety, health, financial security, etc.) but also entail positive or negative impacts on consumer practices and collective community wellbeing (e.g., education, obesity, cancer, safe or green driving, energy conservation, diversity-based health care, etc.). Decision making in most businesses and organizations is largely responsive to demands for short-term profit or cost minimization. On the consumer side, both cultural values and corporate marketing practices that sustain them encourage high levels of consumption necessary to sustain corporate practices. In exploring the emerging applications of behavior science to these challenges, this book showcases emerging work by internationally recognized scholars on leadership and cultural change. The book will aid organizations and leaders in creating new models of stewardship and will open opportunities for innovation while adapting and responding to growing social upheaval, technological advances, and environmental concerns, as well as crises in the global economy, health, education, and environment. This book was originally published as a special issue of the *Journal of Organizational Behavior Management*.
