Working It: Disruption Rules by Greg Hutchins, 2019-09. Are you Future Ready? McKinsey, the global consulting firm, estimates that between the present and 2030, 75 to 375 million workers need to switch jobs that will require new skills and new education just due to automation and tech disruption. In terms of magnitude, it's akin to coping with the large-scale shift from agricultural work to manufacturing that occurred in the early 20th century in North America and Europe and more recently in China. But in terms of who must find new jobs, we are moving into uncharted territory. Those earlier workforce transformations took place over many decades, allowing older workers to retire and new entrants to the workforce to transition to the growing industries. But the speed of change today is potentially faster. The task confronting every economy, particularly advanced economies, will likely be to retrain and redeploy tens of millions of midcareer, middle-age workers. In this book, we explore the Future of Work and how it's going to affect all of us in critical ways. We look at Disruption Rules through the lens of paradigm shifts, disruptive forces, and VUCA: Volatility, Uncertainty, Complexity, Ambiguity. We look at what causes these changes, why it matters to you, the reader, how it impacts you, and most importantly, what you can learn and do as a result of these disruptions. The main title of this book is *Working It*. As the title implies, *Working It* can be what you do to earn a living or what you do to have fun or how you live your life. In other words, *Working It* is all the stuff you do that has meaning and value for you. So when you go through this book, you'll notice that many of the stories go beyond what you do at the place that provides you income. We focus on the meaning and things that are important to your *Working It*.

Disruption Rules: When there's a disruption, most of us find a job or career book to find answers and encouragement. Most old-school job books provide life-career or job-road maps. Kim B. Clark,Jonathan R. Clark,Erin E. Clark,2024-09-17 Generative AI and the remote work revolution show us every day that we re in a new era The rules and norms have changed and so must leadership And yet coercive bureaucracy hierarchy and control old ways of thinking and working are still with us a deep seated and powerful legacy We are living through a profound transition from an old industrial era to a new one that is digital transparent and complex In this important new book by former dean of Harvard Business School Kim Clark written with his business school professor son Jonathan and management consultant daughter Erin the dynamic struggle between two competing paradigms of leadership is compellingly illustrated an old paradigm that involves control and power over people versus a new one that enables and inspires power through people With rich examples and stories the authors show how deeply ingrained the legacy model of leadership remains and how destructive it is causing waste and loss of human potential stifling innovation and ultimately resulting in what the authors call organizational darkness They go on to articulate a new positive model one that consciously seeks to do good and to make things better that cares for people helping them to thrive and that mobilizes people to solve tough problems These three elements they argue are the soul heart and mind of leadership and activating them requires careful

attention to both the personal and the organizational dimensions of leadership The narrative is interwoven with probing analysis and reflection and the authors speak clearly and frankly about the moral aspects and impact of leadership They also provide a concrete frame and approach for scaling the new model and creating a vibrant leadership system Leading Through is a deep and essential account of the evolution of our leadership thinking and practice that is both timely and timeless
