as the major context for the research The style in translation is approached from perspectives of the author the source text the translated texts and the translator Both the parallel model and the comparable model are employed and a multiple complex model of comparison is proposed The research model both quantitative and qualitative is duplicable within other language pairs Apart from the basics of corpus building readers may notice that literary texts offer an ideal context for stylistic research and a parallel corpus of literary texts may provide various observations to the style in translation In this book readers may find a close interaction between translation theory and practice Tables and figures are used to help the argumentation The book will be of interest to postgraduate students teachers and professionals who are interested in corpus based translation studies and stylistics *Phraseology* Sylviane Granger,Fanny Meunier,2008-06-01 Long regarded as a peripheral issue phraseology is now taking centre stage in a wide range of fields This recent explosion of interest undoubtedly has a great deal to do with the development of corpus linguistics research which has both demonstrated the key role of phraseological expressions in language and provided researchers with automated methods of extraction and analysis The aim of this volume is to take stock of current research in phraseology from a variety of perspectives theoretical descriptive contrastive cultural lexicographic and computational It contains overview chapters by leading experts in the field and a series of case studies focusing on a wide range of multiword units collocations similes idioms routine formulae and recurrent phrases The volume is an invitation for experienced phraseologists to look at the field with different eyes and a useful introduction for the many researchers who are intrigued by phraseology but need help in finding their way in this rich but complex domain Cross-linguistic Correspondences Thomas Egan,Hildegunn Dirdal,2017-11-15 Contrastive Linguistics is an expanding field as witnessed by the publication in recent years of an increasing number of monographs collected volumes and journal articles The present volume which comprises an introduction and ten chapters dealing with lexical contrasts between English and other languages shows advances within the well established lexical work in the field Each of the chapters takes lexical items as its starting point and compares English with one or more languages The languages represented are Spanish Lithuanian Swedish German Norwegian and Czech Furthermore they emphasise the link between lexis and grammar not only within the same language but also across languages Finally several studies represent one of the more recent developments of contrastive linguistics namely a growing focus on genre and register comparisons The book should appeal to both established scholars and advanced students with an interest in lexis genre corpus linguistics and or contrastive linguistics **Proceedings / Anglistentag 1995 Greifswald** Jürgen Klein,Vanderbeke Dirk,2016-11-21 No detailed description available for Proceedings Anglistentag 1995 Greifswald MLA International Bibliography of Books and Articles on the Modern Languages and Literatures ,2008 **Collins English Dictionary** John Sinclair,1994 Since the new edition of Collins English Dictionary CED two and a half years ago major revolutions have struck the countries we knew as the USSR Czechoslovakia and Yugoslavia new states such as Eritrea have arisen heads of state have come and gone This
