Alia Monterojo may be the country director of one of the largest consulting firms in Manila but she absolutely doesn't want to be at this important breakfast meeting right now. In another time she would have been in La Union spending her only free week a year at the beach with a certain someone who doesn't even know her full name. She's missed the trip for several years now for good reason but she still wishes things were different that she was with him instead. This year she gets her chance when he shows up at the breakfast meeting as an invited guest because he's the CEO of the small company they might acquire.

Content notes: As of 2021 this is set in a somewhat near and safer future and the covid lockdown various quarantines in the Philippines happened as is are mentioned and have an effect on the plot and characters.

Intermediate Physics for Medicine and Biology Russell K. Hobbie, Bradley J. Roth, 2007-09-09 This text bridges the gap between introductory physics and its application to the life sciences. It is intended for advanced undergraduates and beginning graduate students. The Fourth Edition is updated to include new findings, discussion of stochastic processes and expanded coverage of anatomy and biology. The text includes many problems to test the student's understanding and chapters include useful bibliographies for further reading. Its minimal prerequisites and wide coverage make it ideal for self study. The fourth edition is updated throughout to reflect new developments.

Mathematics of Uncertainty for Coping with World Challenges John N. Mordeson, Sunil Mathew, 2021-02-23 This book ranks countries with respect to their achievement of the Sustainable Development Goals and their vulnerability to climate change. Human livelihoods, stable economies, health and high quality of life all depend on a stable climate and earth system and a diversity of species and ecosystems. Climate change significantly impacts human trafficking, modern slavery and global hunger. This book examines these global problems using techniques from mathematics of uncertainty. Since accurate data concerning human trafficking and modern slavery is impossible to obtain, mathematics of uncertainty is an ideal discipline to study these problems. The book also considers the interconnection between climate change, world hunger, human trafficking, modern slavery and the coronavirus. Connectivity properties of fuzzy graphs are used to examine trafficking flow between regions in the world. The book is an excellent reference source for advanced undergraduate and graduate students in mathematics and the social sciences as well as for researchers and teachers.
