Public Services and Administration: Bridging E-Government and E-Business Charalabidis, Yannis,2010-07-31 During the last decade interoperability has emerged as a vivid research area in electronic business and electronic governance promising a significant increase in productivity and efficiency of information systems enterprises and administrations Interoperability in Digital Public Services and Administration Bridging E Government and E Business provides the latest research findings such as theoretical foundations principles methodologies architectures technical frameworks international policy standardization and case studies for the achievement of interoperability within the provision of digital services from administration and businesses toward the user citizens and enterprises Organizational Network Analysis Anna

Ujwary-Gil,2019-12-11 The integrated meta model for organizational resource audit is a consistent and comprehensive instrument for auditing intangible resources and their relations and associations from the network perspective This book undertakes a critically important problem of management sciences poorly recognized in literature although determining the current and future competitiveness of enterprises sectors and economies The author notes the need to introduce a theoretical input which is manifested by the meta model An expression of this treatment is the inclusion of the network as a structure of activities further knowledge as an activity and intangible assets as intellectual capital characterized by a structure of connections The case study presented is an illustration of the use of network analysis tools and other instruments to identify not only the most important resources tasks or actors as well as their effectiveness but also to connect

the identified networks with each other The author opens the field for applying her methodology revealing the structural and dynamic features of the intangible resources of the organization The novelty of the proposed meta model shows the way to in depth applications of network analysis techniques in an intra organizational environment Organizational Network Analysis makes a significant contribution to the development of management sciences in terms of strategic management and more strictly resource approach to the company through structural definition of knowledge application of the concept of improvement oriented audit abandoning a narrow understanding of this technique in terms of compliance reliable presentation of audits available in the literature rigorous reasoning leading to the development of a meta model close linking of knowledge and resources with the strategy at the design stage of the developed audit model including the analysis of link dynamics and networks together with an extensive metrics proposal an interesting illustration of the application with the use of metrics tables and charts It will be of value to researchers academics managers and students in the fields of strategic management organizational studies social network analysis in management knowledge management and auditing knowledge resources in organizations

The Practice of Enterprise Modeling Anne Persson, Janis Stirna, 2009-11-16 Enterprise modeling EM has gained substantial popularity both in the academic community and among practitioners A variety of EM methods approaches and tools are being developed and offered on the market In practice they are used for various purposes such as business strategy development process restructuring as well as business and IT architecture alignment and governance PoEM 2009 the second IFIP WG 8.1 Working Conference on The Practice of Enterprise Modeling took place in November in Stockholm Sweden The conference series is a dedicated forum where the use of EM in practice is addressed by bringing together researchers users and practitioners in order to develop a better understanding of the practice of EM to contribute to improved EM practice as well as to share knowledge and experiences PoEM 2009 attracted 41 submissions from many different parts of the world out of which the Program Committee selected 17 high quality papers Among the authors of these papers we find both researchers and practitioners The resulting program reflects the fact that the topic of EM encompasses human organizational issues as well as more technical aspects related to the development of information systems The program was organized in six thematic sessions Experiences in EM The process of modeling EM in information systems development Model quality and reuse EM for Services modeling New ventures in EM The program also featured two keynotes by experienced EM practitioners Hvard D
