Japan Masaaki Takahashi, 2007 Insightful look at the many young interior designers and architects creating an impression in Japan today

□□□□□□□□ Cathelijne Nuijsink, 2012 Nowhere in the world have architects built homes as small as in Japan and nowhere with such success This title presents the designs of the latest generation of architects and situates them in the historical evolution of Japanese housing The extremely small Japanese dwelling by Western standards can barely be considered a comfortable place This requires knowledge of the traditional Japanese home the family culture and the limitations of building

in densely populated areas The strength of the Japanese dwelling turns out not to lie in a rational quantity of square metres but to be of a spiritual nature Using critical research interviews and projects This book presents the state of the art of the individual house in Japan In addition it provides insight into the unique design approach of different generations of Japanese architects The 21 completed homes in this reference book are richly illustrated with drawings and photographs In this way this book offers inspiration for the construction of unique small dwellings The Japanese House Reinvented Philip Jodidio,2016-12-24 Japanese houses today have to contend with unique factors that condition their design from tiny plots in crowded urban contexts to ever present seismic threats These challenges encourage their architects to explore alternating ideas of stability and ephemerality in various ways resulting in spaces that are as fascinating as they are idiosyncratic Their formal innovation and attention to materials technology and measures to coax in light and air while maintaining domestic privacy make them cutting edge residences that suggest new ways of being at home Contemporary Japanese architecture has emerged as a substantial force on the international scene ever since Kenzo Tange won the Pritzker Prize in 1987 This overview of 50 recent houses powerfully demonstrates Japan s enduring commitment to design innovation **House & Garden** ,1926 *The Wall-paper News and Interior Decoration* ,1912 Architecture ,2004 **Home Possessions** Daniel Miller,2021-07-30 Although so much of the life we care about takes place at home this private space often remains behind closed doors and is notoriously difficult for researchers to infiltrate We may think it is just up to us to decorate transform and construct our homes but in this book we discover a new form of estate agency the active participation of the home and its material culture in the construction of our lives What do the possessions people choose to take with them when moving say about who they are and should we emphasize the mobility of a move or the stability of what movers take with them How is the home an active partner in developing relationships Why are our homes sometimes haunted by ghosts This intriguing book is a rare behind the scenes expos of the domestic sphere across a range of cultures Examples come from working class housewives in Norway a tribal society in Taiwan a museum in London tenants in Canada and students from Greece to produce a genuinely comparative perspective based in every case on sustained fieldwork So Japan long thought to be a nation that idealizes uncluttered simplicity is shown behind closed doors to harbour illicit pockets of disorganization while the warmth inside Romanian apartments is used to expel the presence of the state Representing a vital development in the study of material culture this book clearly shows that we may think we possess our homes but our homes are more likely to possess us *Modern Asian Design* D.J. Huppatz,2018-02-22 Modern Asian Design provides a comprehensive introduction to the development of Asian design in the modern period both tracing historical threads and offering a theoretical framework within which to chart the history of design in Asia Rather than a singular Asian history this book presents a series of studies centred on trade routes colonial relationships regional networks and cross cultural exchanges Modern Asian Design builds on existing resources beyond design history in an effort to map the field focusing particularly on relations between Asia and the

West and also across Asian design cultures Opening with a brief overview of trade and exchange networks in the 17th and 18th centuries the bulk of this study comprises analysis of the development of modern design in Asia during the later 19th and early 20th centuries a period of rapid modernisation The book s final two chapters bring these central ideas into a contemporary and highly relevant context
