specific learning From the Foreword by Stergios Botzakis assistant professor of adolescent literacy in the Theory and Practice in Teacher Education Department at The University of Tennessee Knoxville The authors have set forth on a task I feel long is overdue connecting the literacy potential of graphic novels to the content areas This book is a wonderful contribution to the field of content area literacy studies Michael D Boatright assistant professor Department of English Western Carolina University Book Features Advice for selecting and evaluating graphic novels Teaching strategies for each of the four major content domains Guidance for aligning instruction with the Common Core State Standards A list of educational graphic novels organized by content area Study group questions And more William G Brozo is a professor of literacy in the Graduate School of Education at George Mason University in Fairfax Virginia and author of RTI and the Adolescent Reader Gary Moorman is professor emeritus at Appalachian State University in Boone North Carolina Carla K Meyer is an assistant professor in the Reading Education and Special Education Department at Appalachian State University

Teaching Graphic Novels in the English Classroom Alissa Burger, 2017-10-09 This collection highlights the diverse ways comics and graphic novels are used in English and literature classrooms whether to develop critical thinking or writing skills paired with a more traditional text or as literature in their own right From fictional stories to non fiction works such as biography memoir history or critical textbooks graphic narratives provide students a new way to look at the course material and the world around them Graphic novels have been widely and successfully incorporated into composition and creative writing classes introductory literature surveys and upper level literature seminars and present unique opportunities for engaging students multiple literacies and critical thinking skills as well as providing a way to connect to the terminology and theoretical framework of the larger disciplines of rhetoric writing and literature *Disciplinary Literacy Connections to Popular Culture in K-12 Settings* Haas, Leslie, Tussey, Jill, 2020-11-13 Literacy and popular culture are intrinsically linked as forms of communication entertainment and education Students are motivated to engage with popular culture through a myriad of mediums for a variety of purposes Utilizing popular culture to bridge literacy concepts across content areas in K 12 settings offers a level playing field across student groups and grade levels As concepts around traditional literacy education evolve and become more culturally responsive the connections between popular culture and disciplinary literacy must be explored *Disciplinary Literacy Connections to Popular Culture in K 12 Settings* is an essential publication that explores a conceptual framework around pedagogical connections to popular culture While highlighting a broad range of topics including academic creativity interdisciplinary storytelling and skill development this book is ideally designed for educators curriculum developers instructional designers administrative officials policymakers researchers academicians and students

The Other Kind of Funnies Han Yu, 2016-12-14 The Other Kind of Funnies refutes the mainstream American cultural assumption that comics have little to do with technical communication that the former are entertaining in a low brow sense and juvenile whereas the latter is practical and serious to the point of stuffiness The first of its kind this book demonstrates

the exciting possibilities of using comics in technical communication It defines comics as a medium and art form that includes cartoons comic strips comic books and graphic novels provides conceptual and historical backgrounds on comics and discusses the appeals and challenges of using comics style technical communication More specifically it examines comics style instructions educational materials health risk communication and political propaganda communication The author argues that comics style technical communication encourages reader participation produces covert persuasion facilitates intercultural communication benefits underprivileged audiences such as children and readers of lower literacy and challenges the positivist view of technical communication An abundance of comics style technical communication examples carefully selected from across cultures and times demonstrates the argument While the book proposes that comics can create user friendly visually oriented engaging and socially responsible technical communication it is also quick to acknowledge the limitations and challenges of comics style technical communication and provides heuristics on how to cope with them The Other Kind of Funnies is unique in its interdisciplinary approach It focuses on technical communication but speaks to design cultural and intercultural studies historical studies and to some extent education politics and art

How to STEM Carol Smallwood,Vera Gubnitskaia,2013-12-05 During the past few years groups like the President s Council of Advisors on Science and Technology Center for Education have been placing great emphasis on the significance of STEM science technology engineering and math education In brief the US is seen as falling behind the rest of the world in science and technology education In response the curricula have been revised in many educational institutions and school districts across the country It is clear that for STEM to be successful other community organizations most particularly libraries need to be closely involved in the process Library staff realize the importance of getting involved in STEM education but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization This book is designed to meet that need It is timely and relevant How to STEM Science Technology Engineering and Math Education in Libraries is by and for libraries who are involved in contributing efforts into advancing these subjects It is organized in 9 parts including funding grant writing community partnerships outreach research and examples of specific programming activities Authors are drawn from the professional staffs of educational institutions libraries and non profit organizations such as science museums The book contains eight parts each emphasizing a different aspect of how to succeed with STEM Part 1 emphasizes how hands on activities that are both fun and educational can be used to further STEM awareness Parts 2 and 3 contain chapters on the uniting of STEM with Information Literacy Innovative collection development ideas are discussed in Part 4 and Part 5 focuses on research and publishing Outreach is the theme of Part 6 and the programs described in these chapters offer an array of ways to connect with students of all ages The final section of How to STEM Science Technology Engineering and Math Education in Libraries addresses the funding of these programs Librarians of all types will be pleased to discover easy to implement suggestions for collaborative efforts many rich
