The London Weavers Company 16:

The London Weaver's Company 1600 - 1970 Alfred Plummer, 2013-11-05 The Worshipful Company of Weavers the oldest of all the London Livery Companies can trace its origins to a twelfth century craft guild Largely based upon original records never before studied in depth this authorized history of the company covers the period from the end of the reign of Elizabeth I to modern times Alfred Plummer presents a portrait of the London Hand loom weavers in their historical setting living strenuous lives in an industry which was once essential but has now disappeared He describes many fascinating aspects of the Company s eventful history from the numbers of apprentices to their parents and places of origin the attitude towards the admission of women and the enlistment by the Weaver s Company of the powerful pen of Daniel Defoe In addition the work examines the impact of such catastrophes as the Great Plague and the Fire of London The author deals with the dogged struggle for survival of the famous Spitalfields silk weavers and explores the part played by the Weavers and their associated London Livery companies in the plantation of Ulster under James I nearly four centuries ago This book was first published in 1972

Labors Lost Natasha Korda, 2011-09-21 *Labors Lost* offers a fascinating and wide ranging account of working women s behind the scenes and hitherto unacknowledged contributions to theatrical production in Shakespeare s time Natasha Korda reveals that the purportedly all male professional stage relied on the labor wares ingenuity and capital of women of all stripes including ordinary crafts and tradeswomen who supplied costumes props and comestibles wealthy heiresses and widows who provided much needed capital and credit wives daughters and widows of theater people who worked actively alongside their male kin and immigrant women who fueled the fashion driven stage with a range of newfangled skills and commodities Combining archival research on these and other women who worked in and around the playhouses with revisionist readings of canonical and lesser known plays *Labors Lost* retrieves this lost history by detailing the diverse ways women participated in the work of playing and the ways male players and playwrights in turn helped to shape the cultural meanings of women s work Far from a marginal phenomenon the gendered division of theatrical labor was crucial to the rise of the commercial theaters in London and had an influence on the material culture of the stage and the dramatic works of Shakespeare and his contemporaries

England and Wales Great Britain. Local Government Board,1875 **The Annual Index to the Times** ,1906 **... Return of Owners of Land, 1873** England. Local Government Board,1875 The Artisan and the

European Town, 1500-1900 Geoffrey Crossick,2016-12-05 Artisans played a central role in the European town as it developed from the Middle Ages onwards Their workshops were at the heart of productive activity their guilds were often central to the political and legal order of towns and their culture helped shape civic ritual and the urban order These essays which have all been specially written for this collection explore the relationships between artisans and their towns across Europe between the beginning of the early modern period and the end of the 19th century They pay special attention to the

processes of economic juridical and political change that have made the 18th and early 19th centuries a period of such significance. Written by leading historians of European artisans, the essays question the myths about artisans that have long pervaded research in the field. The leading myth was that shared by the artisans themselves: the myth of decline and the belief in each generation that artisans in the past had inhabited a better age. These essays open up for debate the nature of artisanship, the way economic change affected craft production, the political role of artisans, the cultural identification of the artisans with work and masculinity, and the way changing urban society and changing urban structure posed threats to which the artisans had to respond. Trade, Regulation and Empire: State-building in Britain Martha Prevezzer, Perri 6, Ed

Legon, 2025-10-10. This book explores the impact of the Board of Trade upon the British state from the early seventeenth century to the early twentieth century. The study argues that for too long historians have overlooked the Board, yet it was a critical force in shaping the British state and in developing its capacity both for economic regulation and for economic development. Focusing on the slave trade and on the textiles, shipping and infrastructural industries, the authors examine the Board of Trade's role in shaping, promoting and protecting these industries and thereby in defining the British state's economic interests. The book adds the notion of an imperial corporate state to widely used concepts of fiscal, military and mercantilist state building. Challenging the adequacy of the many theories which emphasise taxation and currency in state building, this study stresses the importance of micro-economic interventions. It unpacks the distinctive character of the British state's system of micro-economic governance by tracing one central department's evolution and its relations with other departments, British businesses and infrastructure, and with the governance structures operating between state, company, states, colonies and domestic business. Three sub-periods of the Board of Trade's history are distinguished, each marked by a distinctive relationship with the domestic and imperial economies and by characteristic approaches to regulatory oversight. The book will be of interest to academics and students in business, economic and political history, and all those interested in the structure of the British state, its legacies of running empires, its relationship with industrial policies and industrialisation, and how it developed its regulatory shape. A Survey of London John Stow, 1908 A Weaver-Poet and the Plague Scott

Oldenburg, 2020-09-14. William Muggins, an impoverished but highly literate weaver-poet, lived and wrote in London at the turn of the seventeenth century when few of his contemporaries could even read. A Weaver-Poet and the Plague's microhistorical approach uses Muggins's life and writing, in which he articulates a radical vision of a commonwealth founded on labor and mutual aid, as a gateway into a broader narrative about London's middling sort during the plague of 1603. In debt, in prison, and at odds with his livery company, Muggins was forced to move his family from the central London neighborhood called the Poultry to the far poorer and more densely populated parish of St Olave's in Southwark. It was here, confined to his home as that parish was devastated by the plague, that Muggins wrote his minor epic London's Mourning Garment in 1603. The poem laments the loss of life and the suffering brought on by the plague but also reflects on the social

and economic woes of the city from the pains of motherhood and childrearing to anxieties about poverty insurmountable debt and a system that had failed London's most vulnerable Part literary criticism part microhistory this book reconstructs Muggins's household his reading his professional and social networks and his proximity to a culture of radical religion in Southwark Featuring an appendix with a complete version of London's Mourning Garment this volume presents a street level view of seventeenth century London that gives agency and voice to a class that is often portrayed as passive and voiceless

Epstein, Maarten Prak, 2008-03-31 For a long time guilds have been condemned as a major obstacle to economic progress in the pre industrial era This re examination of the role of guilds in the early modern European economy challenges that view by taking into account fresh research on innovation technological change and entrepreneurship Leading economic historians argue that industry before the Industrial Revolution was much more innovative than previous studies have allowed for and explore the different products and production techniques that were launched and developed in this period Much of this innovation was fostered by the craft guilds that formed the backbone of industrial production before the rise of the steam engine The book traces the manifold ways in which guilds in a variety of industries in Italy Austria Germany Switzerland France Belgium the Netherlands and Britain helped to create an institutional environment conducive to technological and marketing innovations [A Survey of London](#) John Stow, 2015-07-02 A unique book on London published in 1603 and reissued here in the two volume 1908 version edited by C L Kingsford
