$$\begin{array}{r} \text{ } 8 \\ - 112 \\ \hline 726 \end{array}$$

Now that we have completed the first column, we need to move to the next column.

$$8 - \text{ } = 6$$

We can use our *fact families* to solve the first missing number.

Which of these will help us?

Now we can find only the next column.

Fluency Doesn't Just Happen with Addition and Subtraction Nicki Newton, Ann Elise Record, Alison J. Mello, 2019-10-28
Fluency in math doesn't just happen. It is a well planned journey. In this book you will find practical strategies and activities for teaching your elementary students basic addition and subtraction facts. The authors lay out the basic framework for building math fluency using a cycle of engagement, concrete, pictorial, abstract, and provide a multitude of examples illustrating the strategies in action. You will learn how to help students to model their thinking with a variety of tools, keep students engaged through games, poems, songs, and technology, assess student development to facilitate active and continuous learning, implement distributed practices throughout the year, boost parental involvement so that students remain encouraged even as material becomes more complex. A final chapter devoted to action plans will help you put these strategies into practice in your classroom right away. Most importantly, you will open the door to deep and lasting math fluency. *Office 2010: The Missing Manual* Nancy Conner, Matthew MacDonald, 2010-07-14 Microsoft Office is the most widely used software suite in the world.
