Teaching Children to Read Douglas Ray Reutzel,Robert B. Cooter,2004 For Elementary Reading Methods courses This

comprehensive and balanced look at literacy practice has long been one of the most popular reading methods texts available. The text begins by introducing seven principles for comprehensive reading instruction and then explains the theoretical foundations of teaching reading. Part I builds on those foundations with specific methods in Part II and then in Part III it describes how to create a variety of learning centers and how to plan developmentally appropriate reading curriculum for students in both K-3 and 4-8 classrooms. Chapters 12 and 13 provide a continuum of knowledge by describing classroom organization and curriculum for grades 4-6 and 6-8.

Information & Technology Literacy Standards Matrix Calvin J. Potter, 2000. Intended to help library media specialists, technology educators, and curriculum planning teams identify where specific information and technology competencies might best fit into the assessed content areas of the curriculum, this document presents a matrix that identifies the correlation between Wisconsin's Information and Technology Literacy (ITL) Standards and English language arts, mathematics, science, and social studies standards. An introductory section describes the Matrix Project; the Matrix Project Advisory Group; academic standards; definitions; the matrix models; and the list of integration resources. The second section presents Matrix Model 1, which correlates content standards for each of the four curriculum areas with the ITL Standards. The third section presents Matrix Model 2, which separates the four content standards of the ITL Standards, i.e., media and technology, information and inquiry, independent learning, and the learning community, and arranges them by three grade ranges: K-4, 5-8, and 9-12. The final section provides a listing of resources and resource providers for those educators desiring additional information or ideas on how to integrate information and technology competencies into curriculum and classroom instruction. Several World Wide Web sites that contain evaluated lesson plans, many of which incorporate information and technology skills, are included.

Lesson Plans for the Busy Librarian Joyce Keeling, 2002-03-05. Suggests learning activities for developing library skills such as researching a topic, finding books on the shelves, and acting out stories.

Making Nonfiction and Other Informational Texts Come Alive Kathy Pike, Jean Mumper, 2004. Offering a fresh approach, this much-needed text mirrors the features that are traditionally found in nonfiction texts: illustrations, diagrams, insets, boxed materials to help clarify and explain the concepts being presented. This is a perfect complement to reading methods courses, which includes a wealth of nonfiction titles that teachers can readily use effectively in a balanced literacy program. Packed with ideas and suggestions for the classroom, Pike and Mumper offer everything one needs to know in order to use nonfiction texts in the classroom, from using them in literature circles and as models for writing or for research purposes.
