Guided Discovery to Support Learning Lisa Göbel,2021-02-23 Technology is becoming more and more integrated in
mathematics teaching and the use of technology is explicitly demanded by the curricula Technology can be for example
integrated while conceptualizing parameters of quadratic functions In this thesis three technical visualizations classic
function plotter drag mode and sliders for the manipulation of parameters of quadratic functions shall be compared with an
access without the possibility of technical visualization For this purpose a Guided Discovery environment was developed
which was conducted in an intervention study with 14 classes of grade 9 N 383 Different strengths and weaknesses of the
individual visualizations in favor of the dynamic visualizations by drag mode and slider are shown Also different potentials
and constraints of the use of technology are visible for example the students use the technology to test their own hypotheses
that were generated through the use of technology The author Lisa G bel completed her dissertation as a research assistant
