SOAP FORMAT

S - Subjective Patient states that anyone for fear of the seizure, if that statement is quoted to the patient may be used, as well as per sequester statements.	Client reported feeling depressed, but not suicidal, since his bike accident and stated "I didn't care if I was sad with the pain or crash." He stated, "I don't believe in treatment, but I'll give it a try as long as I have help with the cravings." He reported being fearful of relapse due to strong cravings, but stated "I feel better being on Suboxone, it makes the cravings more manageable." He reported residual pain from his bike accident.
O - Objective Observable data or information supporting the subjective statement. This may include the physical appearance of the patient (e.g., weight, clarity, comfortable, disheveled, well-groomed, well-maintained, etc.), signs, results of completed lab/diagnostic test, and medication the patient is currently taking or being prescribed.	Client was withdrawn and guarded. He participated in group therapy and engaged in the group process with the help of the counselor. He was able to identify two "triggers," such as "seeing the scene from my accident" and "being around other people who use stuff." Withdrawal symptoms have resolved, however, he still has strong cravings despite improvement since starting Suboxone.
A - Assessment The counselor's or clinician's assessment of the situation, the session, and the patient's condition, prognosis, response to intervention, and progress in achieving treatment plan goals/objectives. This may also include the diagnosis with a list of symptoms and information used in differential diagnosis.	Opioid use: post-withdrawal. Overall, Mr. Doe appears engaged in SUD treatment at this time. He still has strong cravings and is fearful of relapse, but appears to be responding to Suboxone. Unclear if higher dose is necessary – will coordinate with Suboxone prescriber. He continues to report depressive and pain symptoms and would benefit from further mental and physical health follow up, respectively.
P - Plan The treatment plan/next forward, based on the clinical information reported and the assessment.	Substance Use - Client will continue DOP and MAT as prescribed. He agreed to attend at least 1 Narcotics Anonymous meeting at least 1x per week. Continue Suboxone and coordinating with Suboxone prescriber. - Counselor will refer the client to case management for help with housing and employment. Mental Health - Given ongoing depressive symptoms, will refer for mental health assessment. Physical Health - Client will call his PCP to make an appointment by next week. - Refer to case management to DM to ensure the client made PCP appointment.

The Clinic and Elsewhere Todd Meyers,2013-05-15 Despite increasingly nuanced understandings of the neurobiology of addiction and a greater appreciation of the social and economic conditions that allow drug dependency to persist there remain many unknowns regarding the individual experience of substance abuse and its treatment In recent years novel pharmaceutical therapies have given rise to both new hopes for recovery and renewed fears about drug diversion and abuse In *The Clinic and Elsewhere* Todd Meyers looks at the problems of meaning caused by drug dependency and appraises the changing terms of medical intervention today By following a group of adolescents from the time they enter drug rehabilitation treatment through their reentry into the outside world the clinic their homes and neighborhoods and other institutional settings Meyers traces patterns of life that become mediated by pharmaceutical intervention His focus is not on the drug economy but rather on the therapeutic economy where new markets transactions of care and highly porous conceptions of success and failure come together to shape addiction and recovery The book is at once a meditative work of anthropology a demonstration of the theoretical and methodological limits of medical research and a forceful intervention into the philosophy of therapeutics at the level of the individual Watch the trailer <http://www.youtube.com/watch?v=Nfyy21fxp8list> UUge4MONgLFncQ1w1C_BnHcw index 12 feature plc **Tarascon Pocket Pharmacopoeia** Steven M. Morin,2025-06-10 The Oxford Handbook of Sleep and Sleep Disorders covers what sleep is and why it matters but also explains the disorders of sleep and how they can be assessed differentiated and treated Based on contemporary evidence and written accessibly clinicians and health researchers will find this handbook the most comprehensive resource that is available for understanding and managing sleep problems and their effects on people s lives **Persisting Pandemics**

Powel H. Kazanjian,2024-11-15 Persisting Pandemics explores the history of syphilis and AIDS to provide insights into the limits of biomedicine and our experience with epidemics today Novel therapies developed for syphilis and AIDS became renowned in the medical field and the broader public sphere as exemplars of biomedical innovations Public health campaigns based on these spectacular biomedical advances however have repeatedly fallen short of their goals to eliminate syphilis and AIDS in the population The diseases epitomize the power of innovative biomedical therapies for the individual while unveiling limitations of scientific medicine in the domain of public health The need for a public health approach to address mistrust in science government indifference and racial inequalities is relevant for strategies to eliminate Covid 19 today Persisting Pandemics argues that campaigns to eliminate these diseases have not succeeded because they have not adequately addressed how diseases like AIDS syphilis and Covid spread unevenly in populations according to race ethnicity and geographic location Despite the expectation of public health officials that medical advances would render epidemics obsolete new diseases continue to emerge and spread regardless of efforts to eliminate them Medical doctor and historian Powel Kazanjian concludes that narratives of syphilis AIDS and Covid unlike smallpox do not contain a discrete ending at least not within the timelines specified by their elimination campaigns Instead they will be a continued part of our existence Provided by publisher *Surviving Alex* Patricia A. Roos,2024-05-17 Patricia Roos was a professor of sociology at Rutgers University when she lost her 25 year old son Alex to a heroin overdose Turning her grief into action she began to research the social factors and institutional failures that contributed to his death *Surviving Alex* tells her moving story while describing a more compassionate approach that would provide proper care to substance users and reduce addiction
