Resources in Education ,1997 **Surviving the ICE Age** Joanna Dreby,2025-06-06 For the past three decades U S immigration policy has become increasingly restrictive focused on enforcement both at the southern border and across the country A shift in emphasis from status regularization to criminalization has had rippling effects for families and communities While we know much about how immigration enforcement impacts the undocumented we know less about longstanding effects on U S citizens In *Surviving the ICE Age* sociologist Joanna Dreby draws on interviews with young adults with foreign born parents to better understand what it was like to grow up during a time of heightened U S migratory control Dreby shows that a restrictive approach to immigration creates problems over time and across generations These issues occur regardless of one s citizenship status and go beyond deportations Despite having pride in their heritage her interviewees did not talk much about immigration She refers to this unwillingness and at times inability to speak about immigration as silencing Silencing in a community or family is often intended to protect children but this can leave them with little information about their backgrounds and status leading to fear and anxiety instead Self silencing often resulted from traumatic experiences tied to enforcement episodes which sometimes took the form of memory loss or emotional withholding Dreby finds that experiences with the immigration system that disrupted relationships in a child s household arising from family separations moves or changing roles in the family had especially long term effects causing at times ongoing mental health issues Even the risk of immigration involvement left some young adults feeling vulnerable and undermined their sense of safety and security as U S citizens Dreby also highlights stories that offer hope Young adults developed strategies to persevere and children who grew up in communities and families that openly talked about migration felt empowered and fared much better especially when they had access to resources such as adequate food and shelter mental health services and community support Dreby calls for policies and practices to mitigate the harms of restrictive migratory control on children s wellbeing such avoiding the arrest of parents in front of children and ensuring that U S citizen children s interests are considered in immigration court without their direct involvement *Surviving the ICE Age* details the generational harms caused by U S immigration policy and offers suggestions for a better way forward *Department of State Publication* ,1959

Research in Education ,1974 Wisconsin ECIA Chapter One Annual Evaluation Report for Migrant Programs, Fiscal Year ... Wisconsin. ECIA Chapter 1 Migrant Education Program,1984 **Annual Report to the United Nations on the Administration of the Trust Territory of the Pacific Islands** ,1977 Mindset Mathematics Jo Boaler,Jen Munson,Cathy Williams,2018-02-26 Engage students in mathematics using growth mindset techniques The most challenging parts of

teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume you will find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas at the fifth grade level through visualization play and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson, and Cathy Williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach. So the authors designed Mindset Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning. Open creative and visual mathematics tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that there is no such thing as a math person; anyone can learn mathematics to high levels. Mistakes, struggle, and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics. With engaging questions, open-ended tasks, and four color visuals that will help kids get excited about mathematics, Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum.
