SA node → P →

activation initiated wave of depolarization through TA, and through Bachmann's bundle to LA, stimulating atrial contraction

AV node → P-R INTERVAL

wave of depolarization travels to AV node to connect atria and ventricles and pauses, allowing atrial systole to finish before ventricular systole begins

→ **PURKINJE BUNDLE BRANCHES** → QRS COMPLEX

after pause at AV node, wave of depolarization spreads rapidly down bundle branches to Purkinje fibers then discharges into ventricular myocardium

Study Guide For Ekg National Exam 2015:

Clinical Informatics Study Guide John T. Finnell, Brian E. Dixon, 2015-11-09 This book provides content that arms clinicians with the core knowledge and competencies necessary to be effective informatics leaders in health care organizations. The content is drawn from the areas recognized by the American Council on Graduate Medical Education (ACGME) as necessary to prepare physicians to become Board Certified in Clinical Informatics. Clinical informaticians transform health care by analyzing, designing, selecting, implementing, managing, and evaluating information and communication technologies (ICT) that enhance individual and population health outcomes, improve patient care processes, and strengthen the clinician-patient relationship. As the specialty grows, the content in this book covers areas useful to nurses, pharmacists, and information science graduate students in clinical health informatics programs. These core competencies for clinical informatics are needed by all those who lead and manage ICT in health organizations, and there are likely to be future professional certifications that require the content in this text.
