

American Government/American History

EOC Study Guide

ENLIGHTENMENT ERA (1600 – 1800)

- The Enlightenment was a 17th century intellectual movement.
- It worked to limit the power of monarch governments (kings and queens) and religious leaders.
- Other important Enlightenment ideas include popular sovereignty and natural rights.
- John Locke believed the job of government was to protect the rights of people or be overthrown, and his ideas greatly influenced the American colonists.
- Major Enlightenment thinkers:
 - Locke = Natural Rights
 - Montesquieu = Separation of Powers
 - Voltaire = Freedom of Speech
- Enlightenment ideas led to the American Revolutionary War, the Declaration of Independence, U.S. Constitution, Bill of Rights, and the French Revolution.

INDUSTRIAL REVOLUTION (CONTINUED)

- Urbanization led to several negative effects:
 - Pollution
 - Dangerous working conditions
 - Long hours and low wages
 - Child labor
 - Slums and poor housing conditions
 - Cramped living spaces and rampant diseases
- Labor unions formed to combat terrible working conditions in factories and sought better pay, shorter hours, and improved conditions.
- Henry Ford – founder of the Ford Motor Company – used the assembly line to produce his cars fast and cheap. This revolutionized manufacturing and gave rise to specialized labor.

INDUSTRIAL REVOLUTION (1750 – 1900)

- The Industrial Revolution took place in the late 1700s in Europe and in the early 1800s in America, and it was a time of technological innovation.
- Improved agricultural technology, like steam-powered tractors and large-scale food processing factories led to increased food yields.
- Railroad linked cities, brought materials to factories more efficiently, increased trade between cities and countries, and allowed people to move more freely.
- Many people moved from rural areas to cities to find work in newly built factories, a movement known as urbanization.

Study Guide For Eoc Nm History:

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Nicholson, Anja Wittkowski, Joanne Louise Riebschleger, Jean Lillian Paul, 2022-11-01 Te Linde's Operative Gynecology, South Asian Edition Dr Sharmila Arun Babu, 2021-11-01 The First South Asian Edition of Te Linde's Operative Gynecology has been thoroughly edited to suit the needs of students and practitioners in South Asian countries keeping in mind the rapidly changing concepts in Operative gynecology. This globally acclaimed textbook guides the reader through the well illustrated techniques of gynecological surgeries. Salient Features of the South Asian Edition: Keeping the essence of the text, all the chapters have been updated and revised to adapt to local practices and conditions in South Asian countries. Features like Stepwise approach to perform gynecologic operations and Best surgical practices that are important components of each chapter have been retained and updated wherever necessary. Data from recent trials, latest staging and classifications of cancers have been included in oncology chapters. Indian data pertaining to common gynecological conditions and cancers have been incorporated. Medicolegal laws in India which have a bearing on day to day practice of Obstetrics and Gynecology have been included in relevant chapters. In the chapter Tubal Sterilization, detailed preoperative evaluation, selection criteria and statistics from Indian perspective have been incorporated. Government of India guidelines for postpartum sterilization are also included. Recent advances in Robotic surgery in India and a note on Robotic Assisted Laparoscopic Hysterectomy have been included. Content has been thoroughly peer reviewed by subject experts of national repute.
